Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The year 1991 was a turning point in the history of the Indian economy. Liberalization saw a tremendous increase in competition from multinationals in almost all industrial sectors. This book examines how a few ' Good ' Indian companies became ' Excellent ' by withstanding the onslaught of competitive pressures and flourishing despite a fast-changing and unpredictable economic environment. Distilling vast amounts of data on 23 Indian companies belonging to a range of industries, the book draws out the factors that made them achieve business excellence. The author uses a three-tier filtering process with increasingly strict criteria for narrowing down from the initial 144 companies to the 23 researched cases, and then to the final seven exceptional organizations. In the quest to find the answer to what made these companies perform exceptionally, the author proposes a business model based on strategy, execution excellence and leadership, which provides a compelling explanation for the superlative performance of these outstanding companies.

Based on tests conducted by Consumers Union, this guide rates new cars based on performance, handling, comfort, convenience, reliability, and fuel economy, and includes advice on options and safety statistics.
