From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

This teacher appreciation notebook or journal makes a great motivational and inspirational notebook gift for the teacher or homeschooler in your life. This Premium Teacher Planner is perfect for: Teacher Appreciation Gifts Teacher End of the School Year Gifts Teacher Thank You Gifts Teacher Inspirational Quote Gifts Teacher Retirement Gifts

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America ' s premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede ' s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid ' s, handle like a pro ' s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension ' s condition. He outlines testing procedures that will help you gauge how well you ' re improving your suspension, along with your riding. And, if you ' re inclined to perfect your bike ' s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

STUCK IN A corporate job rut and faced with an unraveling marriage at the age of thirty-six, Roz Savage sat down one night and wrote two versions of her own obituary -- the one that she wanted and the one she was heading for. They were very different. She realized that if she carried on as she was, she wasn't going to end up with the life she wanted. So she turned her back on an eleven-year career as a management consultant to reinvent herself as a woman of adventure. She invested her life's savings in an ocean rowboat and became the first solo woman ever to enter the Atlantic Rowing Race. Her 3,000-mile trial by sea became the challenge of a lifetime. Of the twenty-six crews that set out from La Gomera, six capsized or sank and didn't make it to the finish line in Antigua. There were times when she thought she had hit her absolute limit, but alone in the middle of the ocean, she had no choice but to find the strength to carry on. In Rowing the Atlantic we are brought on board when Savage's dreams of feasts are nourished by yet another freeze-dried meal. When her gloves wear through to her blistered hands. When her headlamp is the only light on a pitch-black night ocean that extends indefinitely in all directions. When, one by one, all four of her oars break. When her satellite communication fails. Stroke by stroke, Savage discovers there is so much more to life than a fancy sports car and a power-suit job. Flashing back to key moments from her life before rowing, she describes the bolt from the blue that first inspired her to row across oceans and how this crazy idea evolved from a dream into a tendinitis-inducing reality. And finally, Savage discovers in the rough waters of the Atlantic the kind of happiness we all hope to find.

Are you still looking for an awesome birthday present? Cute and funny birthday gift idea for your daughter, son, brother and sister, mother, dad.

Increasing Resilience in Police and Emergency Personnel illuminates the psychological, emotional, behavioral, and spiritual impact of police work on police officers, administrators, emergency communicators, and their families. Author Stephanie Conn, a clinician and researcher as well as a former police officer and dispatcher, debunks myths about weakness and offers practical strategies in plain language for police employees and their families struggling with traumatic stress and burnout. Sections of each chapter also offer guidance for frequently overlooked roles such as police administrators and civilian police employees. Using real-world anecdotes and exercises, this book provides strengths-based guidance to help navigate the many complex and sometimes difficult effects of police and emergency work.

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.
