Take your videoconferencing skills from zero to Zoom! Version 2.0, released August 11, 2021 The rise of Zoom during the pandemic has made many of us comfortable with this popular videoconferencing software. But the differences in Zoom from one platform to the next, the long list of complex features, and a constant stream of updates make it challenging to master. Take Control of Zoom, Second Edition provides a comprehensive look at Zoom from start to finish. Beginners will learn everything they need to get started, while more advanced users will sharpen their skills and discover new tricks. Everyone will benefit from extensive details on privacy and security. Many of us rarely touched a video chat or videoconferencing tool until the pandemic hit. Now, we videoconference daily (or more often) for all sorts of reasons—we've gone from zero to Zoom! Despite Zoom's broad adoption, users sometimes struggle to keep up with its features and interface. Zoom changes constantly, and often spreads useful features across several places. This new edition of the book covers all the latest changes and the differences among platforms. You'll learn which Zoom app to use, how to configure your account and app even before your first meeting, how to work in Zoom views and chat in a meeting, and how to create and manage your own meetings. The book also covers how to share your screen, make presentations with PowerPoint or Keynote, annotate shared images, record audio and video, use full-screen mode and multiple displays, and work with machine-learning transcription and captioning. You also learn about virtual cameras—software like Camo, mmHmm, OBS, and Zoom's built-in Slides as Virtual Background feature—that can take one or more media sources—still images, video, animation, app windows, and sometimes more—and mix into a camera feed you can simply select and broadcast as a host or participant in Zoom. This book provides comprehensive advice and directions on planning a meeting, starting it up, and managing it, including running polls and setting up and using breakout rooms. It also provides extensive insight into keeping meetings safe, and warning or removing problematic participants. But what about privacy and security? Since early 2020, Zoom has fixed bugs, promised improvements and delivered them, and come clean about where it fell short. The book covers the current state of Zoom security and privacy, including the introduction in the second half of 2020 of an end-to-end encryption (E2EE) preview available to all hosts. You can find out how E2EE works, Zoom's implementation of it, how to enable it, and how to make sure your E2EE session remains free of snoopers. Topics include:

- How to install and configure Zoom
- Choosing whether or when to use the Zoom web app
- Configuring your physical setup and hardware for best audio and video quality
- Mastering meeting participation, including the various methods of "speaking up"
- Zoom's many mobile and desktop views for seeing other people and shared screens
- The best ways to present using PowerPoint and Keynote
- Finding the best combination of screens and devices to manage each of your presentations
- Becoming a host and starting meetings with one other person or 1,000
- Conducting polls and managing breakout rooms
- Using automatic transcription and captioning features
- How to preserve your privacy when sharing apps, presentations, or other parts of your screen
- Recording a meeting for later playback, presentation, or a podcast
- Deciding whether to upgrade to a paid Zoom tier for meetings you host
- Zoom's security options, including end-to-end encryption
- How co-host and alternate host roles work in managing a meeting

Are the disciplines of education ghosts of a productive past or creative and useful forms of inquiry? Are they in a demographic and organisational crisis today? The contribution of the 'foundation disciplines' of sociology, psychology, philosophy, history and economics to the study of education has always been contested in the UK and in much of the English-speaking world. But such debates are now being brought to a head in education by the demographic crisis. Recent research has shown that with the an ageing population of education academics, in ten years' time, there could be very few disciplinary specialists left working within faculties of education in UK universities. But does that matter and is the UK no more than a special case? How does this 'crisis' look from Europe where the disciplines of education are more embedded, and from the USA with its more diverse higher education system? In this book, leading scholars - including A.H. Halsey, David Bridges, John Furlong, Hugh Lauder, Martin Lawn and Sheldon Rothblatt - consider the changing fortunes of each discipline as education moved away from the dominance of psychology in the 1930s, 1940s and 1950s as a result of the growing importance of the other disciplines and new social questions, and how the changing epistemological and political debates of the last twenty years have resulted in their progressive demise. Finally, the book confronts the question as to whether the disciplines have a place in education in the twenty-first century. The book brings the coming crisis into the public view and explores the issue of the past, current and future relevance of the disciplines to the study of education. It will be of interest to all international academics and researchers in the field of education and the contributory disciplines as well as to students on educational research methods courses.

Themes in European History treats in thematic fashion a period of great change and upheaval in Europe. A collection of twelve essays by five leading historians, this textbook:

- * highlights important developments and changes that occurred
- * sets these changes in their social and cultural context as well as in the political framework
- * concentrates on the most important powers in Europe
- * completes each essay with suggestions for further reading to guide your students into continuing their research.

Whereas other textbooks of this period focus on the political events, Themes in Modern European History uses a comparative history of institutions and societies, with emphasis on the cultural changes as well. Students are provided with the whole picture of events and are made aware of the wider consequences of the changes taking place - enabling them to understand all aspects of the dramatic transformation of Europe from 1890-1945.

Virginia Hill, Australia's microwave cooking expert, shows how to get great meals in minutes from your microwave. Super practical 'how-to' instructions help you master the techniques with ease. Then just six ingredients per recipe and heaps of imagination. The result? Great food, sensational flavours and time to spare!

Al Gore has been a passionate advocate of action to halt climate change for many years. In his best-selling book, An Inconvenient Truth, he wrote about the urgent need to address the problems of climate change, presenting comprehensive facts and information on all aspects of global warming in a direct, thoughtful and compelling way, using explanatory diagrams and dramatic photos to clarify and highlight key issues. Adopting the same lucid technique in Our Choice, he proposes solutions at every level of our lives, from the personal and local to the national and political to the area of international policy and law.
