The second edition features: a CD with all of the book's Amos, EQS, and LISREL programs and data sets; new chapters on importing data issues related to data editing and on how to report research; an updated introduction to matrix notation and programs that illustrate how to compute these calculations; many more computer program examples and chapter exercises; and increased coverage of factors that affect correlation, the 4-step approach to SEM and hypothesis testing, significance, power, and sample size issues. The new edition's expanded use of applications make this book ideal for advanced students and researchers in psychology, education, business, health care, political science, sociology, and biology. A basic understanding of correlation is assumed and an understanding of the matrices used in SEM models is encouraged.

This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

In dem vorliegenden Band werden wieder die Ergebnisse einiger in den Agfa Laboratorien durchgeführten Arbeiten mitgeteilt. Die Themen zu diesen Arbeiten sind den verschiedensten Bereichen der photographischen Forschung entnommen, doch sind zwei Gebiete besonders stark berücksichtigt worden, welche heute eine hervorragende Rolle spielen. Einmal ist es die Anwendung der Ergebnisse der Halbleiterphysik zur Erklärung des photographischen Elementarprozesses und der Entwicklungsvorgänge. An sich ist die photographische Anwendung dieses Zweiges der Physik nicht neu, doch ist er durch neue Forschungsergebnisse und Betrachtungsweisen für die Theorie des photographischen Prozesses in letzter Zeit besonders fruchtbar geworden. Das zweite Thema ist die Anwendung der Übertragungstheorie und der Informationstheorie auf photographische Probleme. Ursprünglich in der elektrischen Nachrichtentechnik entwickelt, wurden diese Disziplinen in steigendem Maße auf optische und photographische Probleme angewendet. Da die Grundlagen dieser Methoden vielen Lesern unbekannt sein dürften, wurden sie in einem längeren Aufsatz behandelt. Dieser Band ist Herrn Direktor Dr. ALFRED MILLER, dem langjährigen Leiter der Agfa Filmfabrik in Wolfen gewidmet, durch dessen Tatkraft und Erfahrung nach dem Kriege die Filmfabrik in Leverkusen aufgebaut und auf den heutigen Stand gebracht werden konnte. Ihm ist vor allem auch zu danken, daß durch Gründung des Wissenschaftlich-Photographischen Laboratoriums die wissenschaftliche Forschung auf photographischem Gebiet wieder aufgenommen wurde. An den Arbeiten zur Herausgabe des vorliegenden Bandes war Herr Dr. habil. E. KLEIN in starkem Maße beteiligt. Für seine wertvolle Unterstützung bin ich ihm zu Dank verpflichtet.

Published on the occasion of Theodor Hänsch's 60th Birthday emphasis is placed on precision related to results in a variety of fields, such as atomic clocks, frequency standards, and the measurement of physical constants in atomic physics. Furthermore, illustrations and engineering applications of the fundamentals of quantum mechanics are widely covered. It has contributions by Nobel prize winners Norman F. Ramsey, Steven Chu, and Carl E. Wieman.
