Italian motorcycles have a place in history – and many enthusiasts' hearts – out of all proportion to the numbers that have been built. From Moto Guzzi becoming the first non-British marque to win a TT through to Ducati's achievements in MotoGP, they have also been at the forefront of motorsport despite being far smaller than, at first, the British and later the Japanese manufacturers. If the number of motorcycles built by Italian manufacturers is small, the sheer number of Italian motorcycle factories will surprise readers. Almost 600 marques were identified in researching this book, and there may have been thousands. This is partly because there were so many engines available off the shelf – many of them English – as well as a thriving accessory and component industry. A–Z of Italian Motorcycle Manufacturers only deals briefly with the grand marques Ducati and Moto Guzzi because there have been many dedicated books about them. Instead this is a definitive guide to the factories that have been less widely covered or, in most cases, never before in the English language. Some, such as Bianchi and Garelli, might be familiar: others, remembered for their racing achievements or uniqueness, such as Morbidelli, and many you may have never heard of. But if it was possible to establish when and where the factories were active, and at least a little about the motorcycles they built, then there is an entry for them. An appendix lists the other manufacturers that are lesser known, making this the most complete reference book of Italian motorcycles available today. This book is a complete guide to Italian motorcycle manufacturers, and an essential reference for anyone with an interest in these fascinating vehicles. Axe doesn't suffer from addiction. He relishes it. Ever since an open heart surgery tested his metal, everyday challenges just haven't been enough. Despite living the good life in Texas, his girlfriend, Sunshine, knows as well as he does that no matter how happy Axe might be, he'll always have demons inside to battle. He trades his current ride, the Goat, for its steroid-pumped younger cousin, the Cadillaxe. After equipping the triple black beauty with mirror-mounted radar detection and thermal vision, he takes a test run to Colorado and back. Next he finishes building the most exotic chopper of his career and rides this chrome steed to Daytona Beach. But neither of these vehicles or trips are enough for his insatiable need for adrenaline. Finally, the idea of riding his BMW S1000RR motorcycle from the Pacific to the Atlantic consumes his twisted mind. Axe prepares by modifying the BMW, installing the latest gadgetry, and training. Eventually, brains pass the torch to balls as it becomes clear the task is not intended for the weak or sensible. Through pure determination, the leather-clad biker shatters the record for the fastest motorcycle ride across America.
