We were frustrated by the lack of suitable materials for teaching the lab component of the course. We decided that we could write more appropriate materials for our students rather than wait for the large publishers to produce them. With that motivation we created Astronomy Through Practical Investigations (ATPI). We tried to get publishers to ...

What is the laboratory requirement to qualify to take a science Regents examination? In order to qualify to take a Regents examination in any of the sciences a student must complete 1,200 minutes of actual hands-on (not simulated) laboratory experience with satisfactory documented laboratory reports, provided that, for students who attend educational programs administered pursuant to Education ...

Two-year colleges are critical to science education OCOs future OCOin fact, some data indicate that half of future science teachers will take their first years of science at a two-year school. To address the unique challenges of this special setting, presents 24 articles featuring the most useful and relevant insights and advice from NSTA OCOs Journal of College Science Teaching."

Astronomy is taught in schools worldwide, but few school teachers have any background in astronomy or astronomy teaching, and available resources may be insufficient or non-existent. This volume highlights the many places for astronomy in the curriculum ; relevant education research and "best practice"; strategies for pre-service and in-service teacher education ; the use of the Internet and other technologies ; and the role that planetariums, observatories, science centers, and organizations of professional and amateur astronomers can play. The special needs of developing countries, and other under-resourced areas, are also highlighted. The book concludes by addressing how the teaching and learning of astronomy can be improved worldwide. This valuable overview is based on papers and posters presented by experts at a Special Session of the International Astronomical Union.
