For courses in introductory, preparatory, and basic chemistry. Engages First Time Chemistry Students Basic Chemistry introduces students to the essential scientific and mathematical concepts of general chemistry. With accessible language and a moderate pace, the text is easy-to-follow for first-time chemistry students, as well as those hoping to renew their studies of the subject. In the Fifth Edition, Bill and Karen Timberlake carefully develop core ideas while relating them to the possibility of future careers. The book guides students through basic chemistry problem solving with engaging visuals and a focus on developing the math skills necessary to be successful in the course. End of chapter questions strategically promote integration of cumulative ideas, allowing students to develop a strong foundation for learning chemistry and encouraging them to continue their studies in the field. The main objective in writing this text is to make the study of chemistry an engaging and a positive experience for students by relating the structure and behavior of matter to real life. This new edition introduces more problem-solving strategies, more problem-solving guides, new Analyze the Problem with Connect features, new Try It First and Engage features, conceptual and challenge problems, and new sets of combined problems. Also available as a Pearson eText or packaged with Mastering Chemistry Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. MasteringChemistry is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics(tm). Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Note: You are purchasing a standalone book; Pearson eText and Mastering Chemistry do not come packaged with this content. Students, ask your instructor for the correct package ISBN and Course ID. The Study Guide and Selected Solutions Manual assists students with the text material. It contains learning objectives, chapter outlines, additional problems with self-tests and answers, and answers to the odd-numbered problems in the text.

KEY BENEFIT:Basic Chemistry, Second Editionis a text for the preparatory chemistry course that gives readers the problem-solving tools and techniques needed to be successful in future chemistry courses and in the work force. The book’s unique Guide to Problem-Solving strategy provides a visual, step-by-step plan that helps readers solve a wide variety of problems. Sample and practice problems throughout each chapter allow readers of various levels and learning styles to practice and master quantitative skills.Chemistry in Our Lives, Measurements, Matter and Energy, Atoms and Elements, Names and Formulas of Compounds, Moles and Chemical Quantities, Chemical Reactions and Equations, Quantities in Chemical Reactions, Atomic Structure and Periodic Trends, Molecular Structures in Liquids and Solids, Gases and Their Properties, Solutions, Chemical Equilibrium, Acids and Bases, Oxidation- Reduction: Transfer of Electrons, Nuclear Chemistry, Organic Chemistry, BiochemistryFor all readers interested in preparatory chemistry.

The Study Guide and Selected Solutions Manual as written specifically to assist students using Basic Chemistry. It contains learning objectives, chapter outlines, additional problems with self-tests and answers, and answers to the odd-numbered problems in the text.

Basic Chemistry, T hird Edition gives you the problem-solving tools and techniques you’ll need to succeed in future chemistry courses and in the work force. In a clear, friendly writing style, Timberlake continues to make chemistry relevant and engaging. Her unique “Guide to Problem-Solving” strategy provides a

visual, step-by-step plan that helps to solve a wide variety of problems. Sample and practice problems throughout each chapter help you practice and master quantitative skills. Real-world applications cover modern, interesting topics in helping connect chemical principles to events in today's world, while interviews with engineers, doctors, veterinarians, and biochemists show the importance of chemistry in future careers.

Give allied health students the chemistry they need...how and when they need it! Designed to prepare students for health-related careers, General, Organic, and Biological Chemistry: Structures of Life breaks chemical concepts and problem solving into clear, manageable pieces, ensuring students follow along and stay motivated throughout their first, and often only, chemistry course. Karen Timberlake's friendly writing style, student focus, vetted and refined clinical chemistry problems, and engaging health-related applications help today's students make connections between chemistry and their intended careers as they develop the problem-solving skills they'll need beyond the classroom. The Fifth Edition fully integrates the text with MasteringChemistry to provide an interactive and engaging experience. New Construct a Concept Map activities help students connect ideas through video solutions and live demonstrations, while the text and media establish a clinical focus that ties chemistry directly to allied health. Instructors can also assign MasteringChemistry's new Dynamic Study Modules, which enable students to remediate core math and chemistry skills outside of class, freeing professors to focus on GOB Chemistry concepts and problem solving during class. Also available with MasteringChemistry MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics. Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever-before, during, and after class.

This workbook guides students through basic skills, mathematical review, and successful problem-solving techniques. Practice tests and solutions to odd-numbered text problems are included.

Timberlake's Chemistry: An Introduction to General, Organic, and Biological Chemistry is designed to help prepare students for health-related careers, such as nursing, dietetics, respiratory therapy, and environmental or agricultural science. Assuming no prior knowledge of chemistry, it aims to make this course an engaging and positive experience by relating the structure and behavior of matter to its role in health and the environment. Timberlake maintains the clear, friendly writing style and the real-world, health-related applications that have made this text a leader in the discipline. The Eleventh Edition introduces more problem-solving strategies-including new Concept Checks, more Guides to Problem Solving, and more conceptual, challenge, and combined problems.

This new edition introduces more problem-solving strategies and new conceptual and challenge problems. Each chapter review has been enhanced with learning goals to reinforce the mastery of concepts for students.

Topics in each chapter build from basic ideas that connect with the students experience to the more complex chemistry content. - Art and design provide visual representations of concepts at both the atomic and macromolecular real-life levels. - Every section contains one or more sample problems, which serve as models to assist students in developing problem solving skills. Each sample appears with a complete discussion of its solution, plus a study check for immediate practice, with answers provided at the end of the chapter. - Sets of questions and problems, integrated throughout and at the end of each chapter, encourage students to apply new material immediately and test their understanding. - Pedagogy includes learning goals for each chapter; chapter summaries keyed to each section; and key terms, which first appear in boldfaced type and are listed in a glossary at the end of the chapter and in the index at the back of the text. - Hands-on Explore Your World activities using everyday material at home encourage students to actively explore selected chemistry topics as part of their learning experience. These, along with Health and Environmental Notes that apply concepts to real
