Calculus: An Intuitive and Physical Approach (Second Edition) (Dover Books on Mathematics) Paperback – June 19, 1998. by. Morris Kline (Author) › Visit Amazon's Morris Kline Page. Find all the books, read about the author, and more. See search results for this author.

Calculus: An Intuitive and Physical Approach (Second ...

During these years mathematicians built up not only the calculus but also differential equations, differential geometry, the calculus of variations, and many other major branches of mathematics that depend on the calculus. In achieving these results the greatest mathematicians thought in intuitive and physical terms.

Calculus: An Intuitive and Physical Approach (Second ...

Just as the title implies, an intuitive approach to understanding Calculus. Covers the fundamentals of Single Variable Calculus (derivative/differentiation and integral) all the way to Differential Equations and Multivariable Calculus Polar/Spherical Coordinates. flag Like · see review Diana G Rodriguez rated it it was amazing

Calculus: An Intuitive and Physical Approach (Second Edition) (Dover Books on Mathematics) by Morris Kline.

(PDF) Calculus: An Intuitive and Physical Approach (Second ...

Calculus: An Intuitive and Physical Approach. Morris Kline. Application-oriented introduction relates the subject as closely as possible to science. In-depth explorations of the derivative, the differentiation and integration of the powers of x, theorems on differentiation and antidifferentiation, the chain rule and examinations of trigonometric functions, logarithmic and exponential functions, techniques of integration, polar coordinates, much more.

Calculus: An Intuitive and Physical Approach | Morris ...

Calculus: An Intuitive and Physical Approach (Second Edition) Application-oriented introduction relates the subject as closely as possible to science. In-depth explorations of the derivative, the differentiation and integration of the powers of x, and theorems on differentiation and antidifferentiation lead to a definition of the chain rule and examinations of trigonometric functions, logarithmic and exponential functions, techniques of integration, polar coordinates, much more.

Calculus: An Intuitive and Physical Approach (Second Edition)

Get Free Calculus An Intuitive And Physical Approach Second Edition Dover Books On Mathematics

Learning from a typical Calculus course, you would be forced to memorize calculus principles in a rote fashion, whereas learning from this book teaches you to think mathematically: the concepts are made intuitive and then applied, which allows you to form a lot of connections between the new content and what you already know; there is no need to struggle to memorize any calculations because, by the end, you will simply "feel" the answer and understand how to find it if you don't already know it.

Amazon.com: Customer reviews: Calculus: An Intuitive and ...

Morris Kline uses a more application-oriented approach in this book to talk about calculus. Calculus: An Intuitive and Physical Approach. introduces the subject in a manner that brings it really close to science to help the student understand the complex concepts of calculus easily. It explores the different aspects of calculus using clear proofs that are easy to understand.

Application-oriented introduction relates the subject as closely as possible to science with explorations of the derivative; differentiation and integration of the powers of x ; theorems on differentiation, antidifferentiation; the chain rule; trigonometric functions; more. Examples. 1967 edition.

Get Free Calculus An Intuitive And Physical Approach Second Edition Dover Books On Mathematics

Stimulating account of development of mathematics from arithmetic, algebra, geometry and trigonometry, to calculus, differential equations, and non-Euclidean geometries. Also describes how math is used in optics, astronomy, and other phenomena.

Fresh, lively text serves as a modern introduction to the subject, with applications to the mechanics of systems with a finite number of degrees of freedom. Ideal for math and physics students.

Starting with an abstract treatment of vector spaces and linear transforms, this introduction presents a corresponding theory of integration and concludes with applications to analytic functions of complex variables. 1959 edition.

Erudite and entertaining overview follows development of mathematics from ancient Greeks to present. Topics include logic and mathematics, the fundamental concept, differential calculus, probability theory, much more. Exercises and problems.

Intended for students who have already completed a one-year course in elementary calculus, this two-part treatment advances from functions of one variable to those of several variables. Solutions. 1971 edition.

A thorough and mathematically rigorous exposition of single-variable calculus for readers with some previous experience of calculus techniques. This book can be used as a textbook for an undergraduate course on calculus or as a reference for self-study.

Richly textured and versatile text characterizes real numbers as a complete, ordered field. Rigorous development of the calculus, plus thorough treatment of basic topics of limits and inequalities. 1968 edition.
