The first detailed study of “Neo-Antique” architecture applies an archaeological lens to the study of New York City’s structures Since the city’s inception, New Yorkers have deliberately and purposefully engaged with ancient architecture to design and erect many of its most iconic buildings and monuments, including Grand Central Terminal and the Soldiers’ and Sailors’ Memorial Arch in Brooklyn, as well as forgotten gems such as Snug Harbor on Staten Island and the Gould Memorial Library in the Bronx. Antiquity in Gotham interprets the various ways ancient architecture was

re-conceived in New York City from the eighteenth century to the early twenty-first century. Contextualizing New York's Neo-Antique architecture within larger American architectural trends, author Elizabeth Macaulay-Lewis applies an archaeological lens to the study of the New York buildings that incorporated these various models in their design, bringing together these diverse sources of inspiration into a single continuum. *Antiquity in Gotham* explores how ancient architecture communicated the political ideals of the new republic through the adaptation of Greek and Roman architecture, how Egyptian temples conveyed the city's new technological achievements, and how the ancient Near East served many artistic masters, decorating the interiors of glitzy Gilded Age restaurants and the tops of skyscrapers. Rather

than classifying neo-classical (and Greek Revival), Egyptianizing, and architecture inspired by the ancient Near East into distinct categories, Macaulay-Lewis applies the Neo-Antique framework that considers the similarities and differences—intellectually, conceptually, and chronologically—among the reception of these different architectural traditions. This fundamentally interdisciplinary project draws upon all available evidence and archival materials—such as the letters and memos of architects and their patrons, and the commentary in contemporary newspapers and magazines—to provide a lively multi-dimensional analysis that examines not only the city's ancient buildings and rooms themselves but also how New Yorkers envisaged them, lived in them, talked about them,

and reacted to them. Antiquity offered New Yorkers architecture with flexible aesthetic, functional, cultural, and intellectual resonances—whether it be the democratic ideals of Periclean Athens, the technological might of Pharaonic Egypt, or the majesty of Imperial Rome. The result of these dialogues with ancient architectural forms was the creation of innovative architecture that has defined New York City's skyline throughout its history.

"I thought that I had already thought about everything you could think about Love when Henry Drummond's sermon fell into my hands. My life changed a lot from the moment I read the words in this book and tried to put his teaching into practice." "Paulo Coelho" "If I speak in the tongues of men

and of angels, but have not love, I am a noisy gong or a clanging cymbal." At some point, all of us have heard this passage from St. Paul's Letter to the Corinthians. But do we really understand his message? At the end of the 19th century, the young missionary Henry Drummond was asked to replace a famous preacher. Though at the beginning he did not convince the audience, they were soon captivated by his analysis of the words of the Apostle Paul. This sermon, *The Greatest Thing in the World*, has become a classic and is, without doubt, one of the most beautiful texts ever written on love. Drummond broke it down into the following nine elements: patience, kindness, generosity, humility, gentleness, dedication, tolerance, sincerity and innocence. Contrary to what we are used to hearing, the greatest

treasure in the spiritual life is not faith, but love. No matter what your religious beliefs are, this feeling is, without doubt, the most rewarding way to live. In *The Supreme Gift*, Paulo Coelho adapts Henry Drummond's text, offering a real and powerful message that will help us incorporate love into our daily life and experience all its transformational power in our lives.

Paulo Coelho returns with a remarkable journey of self-discovery. Like the main character in his much-beloved *The Alchemist*, Paulo is facing a grave crisis of faith. As he seeks a path of spiritual renewal and growth, he decides to begin again: to travel, to experiment, to reconnect with people and the landscapes around him. Setting off to Africa, and then to Europe and Asia via the Trans-Siberian Railway, he initiates a journey to revitalize his energy and passion. Even so, he never expects to meet Hilal. A gifted young violinist, she is the woman Paulo loved five hundred years before—and the woman he betrayed in an act of cowardice so far-reaching that it prevents him from finding real happiness in this life. Together they will initiate a mystical voyage through time and space, traveling a path that teaches love, forgiveness, and
