"Why do they do it?" is a question often asked about people who choose to live a polygamous lifestyle. This book aims to answer that very question. Driven by the theories of Kenneth Burke, Janja Lalich, George Cheney, Max Weber, and others, this six-year study explores organizational identification and unobtrusive control and

compliance as it intersects with rhetoric, organizations, and religion. To explore the overarching question of why people choose to live this lifestyle, 14 current and 14 former polygamists volunteered to participate in in-depth interviews. Current members affirm their freedom of choice and say they would never live any other way. Former members state they were victims of brainwashing and organizational control. Both sides are represented equally, and both perspectives are given full treatment. In addition to in-depth interviews, written organizational documents were collected and analyzed using Extended Metaphor Analysis, Aristotelian Analysis, and Burkean Identification Strategies. Why They Believe investigates the question of "why they do it" in a depth never before explored. This book is a must-read for anyone interested in the reasons polygamists choose to live this alternative lifestyle.

This book re-evaluates a rich scientific heritage of space- and history-sensitive development theories and produces an integrated methodology for the comparative analysis of urban and regional trajectories within a globalized world. The main argument put forward is that current mainstream analyses of urban and regional development have forgotten this rich heritage and fail to address the connections between different dimensions of development, the role of history and the importance of place and scale

relations. The proposed methodology integrates elements from different theories - radical economic geography, regulation approach, cultural political economy, old and new institutionalism - that all share a strong concern with time and space dynamics. They are recombined into an interdisciplinary (meta)theoretical framework, capable of articulating the overall problem of socio-economic development and providing methodological anchors for comparative case-study analysis, while recognizing context specificities. The analytical methodology focuses on key dynamics and relations, such as strategic agency and collective action, institutions and structures, culture and discourse, as well as the tension between path-dependency and path-shaping. The methodology is then applied to eight urban and regional cases, mostly from Western Europe, but also from the United States and China. The case studies confirm the relevance of time- and space-sensitive analysis, not only for understanding development trajectories, but also for policy making. They ultimately highlight that, while post-war institutions were able to address systemic contradictions and foster a relatively inclusive development model, the neoliberal turn has led to reductionist policies that not only have resulted in an increase in social and spatial inequalities, but have also undermined growth and democracy.

The quest for integrity in business is not only a reaction against malfeasance in business and associated calls for reform but also a search that stems from changes and new demands in the global business environment. Among the sources of these new demands are the expectations of stakeholders that corporations and their leaders will take more active roles as citizens within society and in the fight against some of the most pressing problems in the world, such as poverty, environmental degradation, defending human rights, corruption, and pandemic diseases. This book presents and critically discusses key case studies from all over the world, offering essential insights, practical advice, and guidance for any business leader wishing to lead an organization with reliable and proven integrity. The authors provide valuable research results as well as real teaching tools for faculty and students.

Thoroughly classroom tested, this text is designed specifically for one-semester accelerated and online courses at the upper undergraduate and MBA levels. It is based on the theme that business and personal decisions are made within both micro- and macro-economic environments. By understanding the environments and their effects on outcomes of decisions, better choices can be made. The text also differs from others in the area because it is less theoretical, it provides a broader perspective for management problem solving, and it bridges economics with other business disciplines. Each chapter includes a management decision-oriented case study that applies tools of economic analysis. An online instructors manual is available to professors who adopt the text.

This bestseller provides a comprehensive introduction to the theory and practice of counselling and psychotherapy.

This sourcebook covers conceptual and practical issues in research design, methods of research and statistical approaches in social and personality psychology. The primary purpose of the handbook is to provide readable yet comprehensive chapters on the range of methods and tools used by researchers in social and personality psychology. In addition, it should alert researchers to methodological possibilities they may not have thought of. Innovative research methods work best when they allow researchers to ask theoretically driven questions that could not have been asked previously, thereby enhancing the quality and depth of their empirical knowledge base. With the help of this text, both new and established social psychologists should learn about appropriate uses of each method and the opportunities they provide for expanding knowledge.

This book contains the expert knowledge base of the field's most experienced practitioners in the field of extradural bone and soft tissue malignancy. Chapters include modern classification, advanced anatomy, imaging, and the concepts around a multidisciplinary approach. Since treating primary tumors requires very different strategies than those

used in metastatic tumors, the book devotes separate sections to each sub-discipline. For primary tumors, the text covers both benign and malignant entities and addresses unique anatomic zones such as the sacrum and skull base which require special technical expertise. For metastatic disease, the authors address the ever-important concept of prognosis, and discuss how to answer the eternal question: "How much should we do, and for whom?". Chapters also explore the state of the art of treatment for the "big 5" histologies (renal cell, lung, breast, prostate, thyroid), with a special chapter emphasis on separation surgery and the now-standard combinatorial care between radiation and surgery. In addition, an entire section is dedicated to evolving surgical technology, which covers the use of minimally invasive techniques, navigation, robotics, 3D-printing, and other evolving technologies for spine tumor care. Infrequently-considered topics, such as how to evaluate a lesion which may be a tumor-mimic, and how to think about economic value in spine tumor surgery, are also presented. Surgical Spinal Oncology serves to help surgeons approach difficult clinical scenarios with a thoughtful, collaborative approach that leverages the best technology and thinking the field of spine oncology has to offer.
