Summary R in Action, Second Edition presents both the R language and the examples that make it so useful for business developers. Focusing on practical solutions, the book offers a crash course in statistics and covers elegant methods for dealing with messy and incomplete data that are difficult to analyze using traditional methods. You'll also master R's extensive graphical capabilities for exploring and presenting data visually. And this expanded second edition includes new chapters on time series analysis, cluster analysis, and classification methodologies, including decision trees, random forests, and support vector machines. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Business pros and researchers thrive on data,

and R speaks the language of data analysis. R is a powerful programming language for statistical computing. Unlike general-purpose tools, R provides thousands of modules for solving just about any data-crunching or presentation challenge you're likely to face. R runs on all important platforms and is used by thousands of major corporations and institutions worldwide. About the Book R in Action, Second Edition teaches you how to use the R language by presenting examples relevant to scientific, technical, and business developers. Under the leadership of Mazu Daoyi (709-788) and his numerous disciples, the Hongzhou School emerged as the dominant tradition of Chan (Zen) Buddhism in China during the middle part of the Tang dynasty(618-907). Mario Poceski offers a systematic examination of the Hongzhou School's momentous growth and rise to preeminence as the bearer of Chan orthodoxy, and analyzes its doctrines against the backdrop of the intellectual and religious milieus of Tang China. Poceski demonstrates that the Hongzhou School represented the first emergence of an empire-wide Chan tradition that had strongholds throughout China and replaced the various fragmented Schools of early Chan with an inclusive orthodoxy. Poceski's study is based on the earliest strata of permanent sources, rather than on the later apocryphal "encounter dialogue" stories regularly used to construe widely-accepted but historically unwarranted interpretations about the nature of Chan in the Tang dynasty. He challenges the traditional and popularly-accepted view of the Hongzhou School as a revolutionary movement that rejected mainstream mores and teachings, charting a new path for Chan's independent growth as a unique Buddhist tradition. This view, he argues, rests on a misreading of key elements of the Hongzhou School's history. Rather than acting as an unorthodox movement, the Hongzhou School's success was actually based largely on its ability to mediate tensions between traditionalist and iconoclastic tendencies. Going beyond conventional romanticized interpretations that highlight the radical character of the Hongzhou School, Poceski shows that there was much greater continuity between early and classical Chan-and between the Hongzhou School and the rest of Tang Buddhism-than previously thought.

With limited authority over state lawmaking, but ultimate responsibility for the performance of government, how effective are governors in moving their programs through the legislature? This book advances a new theory about what makes chief executives most successful and explores this theory through original data. Thad Kousser and Justin H. Phillips

argue that negotiations over the budget, on the one hand, and policy bills on the other are driven by fundamentally different dynamics. They capture these dynamics in models informed by interviews with gubernatorial advisors, cabinet members, press secretaries and governors themselves. Through a series of novel empirical analyses and rich case studies, the authors demonstrate that governors can be powerful actors in the lawmaking process, but that what they're bargaining over – the budget or policy – shapes both how they play the game and how often they can win it.

The aim of the Special Issue is to discuss the main current topics concerning marketing for sustainable tourism with reference to territories (i.e., tourism destinations, protected areas, parks and/or natural sites, UNESCO World Heritage Sites, rural regions/areas, etc.) and tourism enterprises and/or organisations (i.e., destination management organisations, hospitality enterprises, restaurant enterprises, cableway companies, travel agencies, etc.). In destinations where natural resources are pull factors for tourism development, the relationships among local actors (public, private, and local community), as well as marketing choices, are essential to develop sustainable tourism products. To this end, the Special Issue encourages papers that analyse marketing strategies adopted by tourism destinations and/or tourism enterprises to avoid overtourism, to manage mass sustainable tourism (as defined by Weaver, 2000), and to encourage and promote sustainable tourism in marginal areas or in territories suffering lack of integration in the tourism offer. Special attention will be given to contributions on the best practices to manage territories and/or enterprises adopting sustainable marketing strategies.

For almost a century, big-time college athletics has been a wildly popular but consistently problematic part of American higher education. The challenges it poses to traditional academic values have been recognized from the start, but they have grown more ominous in recent decades, as cable television has become ubiquitous, commercial opportunities have proliferated, and athletic budgets have ballooned. In the second edition of his influential book *Big-Time Sports in American Universities*, Clotfelter continues to examine the role of athletics in American universities, building on his argument that commercial sports have become a core function of the universities that engage in them. Drawing on recent scandals on large-scale college campuses and updates on several high-profile court cases, Clotfelter brings clear economic analysis to the variety of problems that sports raise for university and public policy, providing the basis for the continuation of constructive conversations about the value of big-time sports in higher education.

The first book to present a new conceptual framework which offers an initial explanation for the continuing and rapid success of such 'disruptive innovators' and their effects on the international hospitality industry. It discusses all the hot topics in this area, with a specific focus on Airbnb, in the international context.

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface.

Given that 80% of people have experienced sleep problems and 30% suffer from chronic or long-term sleep problems, Timothy Sharp's *The Good Sleep Guide* is an essential tool for reducing the amount of time we spend lying awake, watching the minutes and hours tick by. Based on his own research, Dr. Sharp addresses lifestyle issues as well as physical and psychological problems that interfere with sleep. These include diet, medication, alcohol, and caffeine, as well as depression, anxiety, and relationship difficulties. He offers a commonsense approach that includes specific relaxation techniques and tips to establish a good sleep routine.
