The Climate Reality Project is a non-profit organization involved in education and advocacy related to climate change. The Climate Reality Project came into being in July 2011 as the consolidation of two environmental groups, the Alliance for Climate Protection and The Climate Project, both of which were founded by Al Gore. Among its activities, The Climate Reality Project hosts an annual event called 24 Hours of Reality and, in 2013, launched Reality Drop, a social media tool.

Updated and Expanded version of the Amazon #1 Best Seller in 90-Minute Science & Math Short Reads In all of the coverage and debate about climate change, why hasn't anyone explained the science in plain terms clear enough for anyone to understand--once and for all? "Great [analysis]. Just the right amount of science. Common sense and rational." -- Wayne R. The greenhouse effect is often mentioned. But that is a METAPHOR. What are the fundamental physical processes that drive it? How does carbon dioxide (CO<sub>2</sub>) fit into this process? How EXACTLY does CO<sub>2</sub> compare to other drivers of climate change such as the sun, the oceans, the rest of the atmosphere, water vapor, and clouds? "Very good. I am a geophysicist." -- Ben B. To what extent does human activity actually play a role in climate change? More specifically, the human production of carbon dioxide or CO<sub>2</sub>? "Great book - should be mandatory reading for anyone that uses the term 'Climate Change' " -- Amazon reviewer Macsugar With basic facts, simple logic, helpful illustrations - and some sarcastic humor - each key assumption and claim of anthropogenic global warming (AGW) - now human-driven climate change - are tackled head-on. Then they are promptly shown to be incorrect, illogical, or actually dangerous to human life. "A very useful contribution to bringing sanity and reason back to the analysis of AGW." - Tom P. Read this book to cure yourself from all of the distraction, confusion, and noise in the climate change controversy. Plus learn THREE EFFECTIVE TACTICS to combat the paranoid anxiety about human-generated CO<sub>2</sub>

Warming is Really Happening

that has infected many of our fellow humans (probably people close to you). "Brilliant, what a refreshing approach." -- Christopher K. Finally, in one short and easy-to-read presentation, the bizarre hysteria against carbon dioxide and humanity's alleged impact on drive climate change is put into rational context. "The climate system is a coupled non-linear chaotic system, and therefore the long-term prediction of future climate states is not possible." UN IPCC Report, *Advancing Our Understanding* (2018) Yes, that statement is from an actual document shared inside the book. Why don't more climate change alarmists have an accurate understanding of the actual facts? Now you can help them! Originally published in 2014, *Climate Change Reality Check* became the Amazon #1 Best Seller in 90-Minute Science & Math Short Reads. In this updated and expanded 2020 Edition you'll also have: Illustrated breakdown of the Earth's major atmospheric components (including the 0.04% that is CO<sub>2</sub>) Historical chart of global temperature and CO<sub>2</sub> from the past 600 million years Bonus Appendix: List of notable resources, experts, and presentations that every climate change realist should know and use It is time to stop the dangerous attack against humanity from the climate activism crusade. This is the ultimate CLIMATE CHANGE REALITY CHECK.

The battles over evolution, climate change, childhood vaccinations, and the causes of AIDS, alternative medicine, oil shortages, population growth, and the place of science in our country--all are reaching a fevered pitch. Many people and institutions have exerted enormous efforts to misrepresent or flatly deny demonstrable scientific reality to protect their nonscientific ideology, their power, or their bottom line. To shed light on this darkness, Donald R. Prothero explains the scientific process and why society has

# Access Free Climate Change Reality Check Basic Facts That Quickly Prove The Global

Warming Crisis: Why Global Deniers  
come to rely on science not only to provide a better life but also to reach verifiable truths no other method can obtain. He describes how major scientific ideas that are accepted by the entire scientific community (evolution, anthropogenic global warming, vaccination, the HIV cause of AIDS, and others) have been attacked with totally unscientific arguments and methods. Prothero argues that science deniers pose a serious threat to society, as their attempts to subvert the truth have resulted in widespread scientific ignorance, increased risk of global catastrophes, and deaths due to the spread of diseases that could have been prevented.

In all of the debate and discussion about climate change, why hasn't anyone explained the science in plain and simple terms clear enough to understand--once and for all? "Great [analysis]. Just the right amount of science. Common sense and rational." -- Wayne R. The greenhouse effect is always quoted-but that is a METAPHOR. What is the fundamental physical process that drives it? And how exactly does human activity play such a powerful role with it? How did we go from worrying about global warming to climate change...to carbon dioxide (CO<sub>2</sub>) emissions? "Wonderful book! Best I've ever read on any debate. Real science that can be replicated = reality." - Scott D. Are there gases more powerful and influential in the greenhouse effect than CO<sub>2</sub>? Yes, by a lot! As you will learn in this book... Why aren't we spending more time, money, and attention focusing on those? Smart people want to get to the point of a problem and solve it as quickly, inexpensively, and effortlessly as possible. They know about the Pareto Principle, and you will too after you read this book. It is also called the 80/20 rule. What happens when we apply that principle to the global climate change "consensus"? "Thank You! I always thought the numbers were small, but I never took the time to do the math." -- Mike S. There are

# Access Free Climate Change Reality Check Basic Facts That Quickly Prove The Global

Warming Scam Is Being Sold by Many of the  
many books that are long, technical, and frankly, irrelevant on the topic of climate change. Here are the most important questions that nobody has bothered to answer in straightforward, simple and short language, until now: \* What are basic facts about our planet's atmosphere? And what do they tell us about the fundamental physics of climate change? \* What are the basic physics and assumptions behind the anthropogenic global warming (AGW) hypothesis or belief? Are they valid? \* What element or compound is the single greatest factor in temperature control in our atmosphere? Hint- it isn't carbon dioxide. How does carbon dioxide compare with this other chemical? Written by an engineer and project manager who has a ruthless (yet entertaining) desire to get to the core truth of the subject so that we can all tackle the problem that really matters, this book is the first to strip away all of the nonsense and irrelevant discussions about climate change debate. "Brilliant, what a refreshing approach." -- Christopher K. Before we spend more time, money, and emotional energy on the presumed EFFECTS and CONSEQUENCES of global warming and climate change (things like rising temperatures, rising sea levels, etc., etc.), shouldn't we all have a BASIC UNDERSTANDING of the FUNDAMENTAL PROCESSES AND PHYSICS of our planet's atmosphere? If you have any questions, or doubts about that, this book is for you. "Very good. I am a geophysicist." -- Ben B. Even better, you'll learn (or re-learn) a very simple and indisputable fact about our atmosphere that makes the entire controversy look ridiculous. Use this information as a test (or a bet) the next time you talk with someone on the "other side" of the climate change debate. "A very useful contribution to bringing sanity and reason back to the analysis of AGW." - Tom P. The climate change threat is consuming more of our precious time, energy, and resources. So is the debate about what to do about it. Don't allow

# Access Free Climate Change Reality Check Basic Facts That Quickly Prove The Global

Warming is a Dangerous  
yourself be a part of the problem-get this book so that you can be a part of the solution! If you are convinced that AGW is the biggest threat facing our planet, this book has facts and arguments you need to consider. The author honestly invites you to challenge the assumptions and disprove the conclusions. What will your response be when you hear others state the indisputable and basic facts presented in this book? "Great [publication]. Thanks for the effort, it [is] simplified enough that most should understand." -- Owen B.

Since the early 1990s, voluntary programs have played an increasingly prominent role in environmental management in the U.S. and other industrialized countries. Programs have attempted to address problems ranging from climate change and energy efficiency, to more localized air and water pollution problems. But do they work? Despite a growing theoretical literature, there is limited empirical evidence on their success or the situations most conducive to the approaches. Even less is known about their cost-effectiveness. Getting credible answers is important. Research to date has been largely limited to individual programs. This innovative book seeks to clarify what is known by looking at a range of program types, including different approaches adopted in different nations. The focus is on assessing actual performance via seven case studies, including the U.S. Climate Wise program, the U.S. EPA's 33/50 program on toxic chemicals, the U.K. Climate Change Agreements, and the Keidanren Voluntary Action Plan in Japan. The central goals of Reality Check are understanding outcomes and, more specifically, the relationship between outcomes and design. By including in-depth analyses by experts from the U.S., Europe, and Japan, the book advances scholarship and provides practical information for the future design of voluntary programs to stakeholders and

# Access Free Climate Change Reality Check Basic Facts That Quickly Prove The Global Warming Crusade is Wrong and Dangerous

Zine about climate change, including brief biographies of five young climate activists from around the world. The zine addresses the relationship between climate change and industrialization, ways companies are capitalizing on the effects of climate change, the effects of climate change on the poor,

This is a college ruled composition notebook for anyone who loves simple facts about our planet that prove the hysteria around carbon dioxide (CO<sub>2</sub>) is a misguided (or worse) mass delusion. The simple truth is, it is an anti-science and anti-human cult movement that must be resisted! Inside this paperback cover with a glossy finish you'll find: 100 blank pages with college ruled lines high quality white paper interior Calvin Fray is also the author of the best-selling book *Climate Change Reality Check: Basic Facts that Quickly Prove the Global Warming Crusade is Wrong and Dangerous*. In less than 30 minutes you'll learn and understand why the assault on CO<sub>2</sub> and human-induced "climate change" is the biggest and most dangerous fraud against humanity this century. And you'll have the facts and arguments to prove it to others too! The cover illustration on this notebook speaks for itself. Carbon dioxide is a trace gas, less than 0.04% of our atmosphere. Making comparisons to poison in water (a typical response) is an ignorant analogy that only proves a lack of rational thought. But we encourage you to educate yourself with more facts and logic so you can resist the climate change anti-science, anti-human cultists.

"A very timely and valuable book as we reevaluate how

# Access Free Climate Change Reality Check Basic Facts That Quickly Prove The Global Warming Scenarios Are Dangerous

health care is delivered. It's obvious the status quo is unacceptable and must be transformed. Anyone who agrees will benefit from this book." John M. Chamberlain, Life Fellow of American College of Healthcare Executives (LFACHE), Former Hospital CEO and Physician Practice Executive, Direct Care Lead for Citizen Health

**YOUR HARSH REALITY CHECK** \* A whistleblower shares information from a secret national database that records medical malpractice decisions made against any doctor in the country. \* As wonderful as prescription drugs may be, we now have 4 BILLION PRESCRIPTIONS PER YEAR for Americans. They aren't only flooding into our bodies. They are seeping into our environment with freakish results. \* Adverse reactions from these drugs are the barbaric genocide you haven't heard of: over 100,000 AMERICANS PER YEAR ARE DYING from LEGALLY PRESCRIBED drugs. \* Every business owner is also in the healthcare business. After payroll it is typically the 2nd largest expense! \* The "Affordable" Care Act is a failure. Healthcare expenses have GROWN, now causing OVER 50% of all personal bankruptcies. **YOUR INSPIRING REALITY CHECK** \* That secret database of medical malpractice payments - you'll learn how to access it \* What you can do to protect you and your family from environmental toxins \* How to save most of those 100,000+ American lives every year - maybe yours - with one easy test available today \* Business owners and health plan administrators have learned how to transform employee "sickcare" expenses into genuine health benefits - with millions of dollars going back into the company and into their local community \* Over 1,000 doctors have escaped the managed care "mafia" and created their own private direct care practices. You'll learn how to find them (and learn from them). \* A growing number of Americans are enjoying the more affordable, responsive, and personalized attention of Direct Primary Care. You'll learn

why (and how) inside this book. You have the power, the ability - and yes, the responsibility - to change healthcare for the better. Do it with us now, before it's too late. ABOUT THE AUTHOR: Corazon Fuerte is a health and life insurance agent in California. Her revealing experiences with seniors, retirees, and working families across the state have inspired her to sound the alarm - and share effective solutions - for her fellow Americans. This book is the result. ABOUT THE CO-AUTHOR AND EDITOR: Calvin Fray is author of the popular and influential book "Climate Change Reality Check: Basic Facts that Quickly Prove the Climate Change Crusade is Wrong and Dangerous" (2016). His mission to save the world from self-destructive forces against humanity continues with this book.

"According to the International Energy Agency, we need to keep two thirds of known fossil fuels in the ground to avoid the worst of dangerous climate change. Yet Canada's tar sands industry is focused on rapid expansion. Its business models are based on extracting and burning polluting fuels as fast as possible. ... The only way we can avoid the worst of global climate change is by reducing our dependence on dirty fossil fuels and building a smarter and cleaner economy"--

□ New York Times bestseller □ The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world □ At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope. □ Per Espen Stoknes, Author, What

# Access Free Climate Change Reality Check Basic Facts That Quickly Prove The Global

We Think About When We Try Not To Think About Global

Warming □ There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom. □ David Roberts, Vox □ This is the ideal environmental sciences textbook □ only it is too interesting and inspiring to be called a textbook. □ Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here □ some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being □ giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
