Since the International Labour Organisation's Maritime Labour Convention, 2006 (MLC) came into force internationally on 20 August 2013, it has already been amended, and a further two sets of amendments have been agreed and are expected to come into force in 2019 and 2020. Maritime Labour Convention, 2006 – UK and REG Implementation sets out in detail how the UK, Bermuda, Cayman Islands, Gibraltar and the Isle of Man (being the members of the Red Ensign Group (REG) which are subject to the MLC) have implemented the Convention. Specific references are given to the laws, merchant shipping notices and guidance, as well as identifying the areas where implementation is permitted by way of collective agreements. As the MLC sits in the context of the wider international regulatory regime, it expressly endorses the application of other international instruments and standards, particularly those of the International Maritime Organisation. Furthermore, many of the MLC's mandatory provisions have been incorporated into EU Directives, which are relevant to the UK and Gibraltar. These international and regional provisions are also referenced. Chapter 1 sets out an introduction to the ILO and the MLC. Chapter 2 describes the general approach of how the UK applies its legislation to UK ships and, while they are in UK waters, non-UK ships without MLC documentation, and non-UK ships with MLC documentation. Chapters 3-22 describe the UK provisions in more detail as the other REG members' laws are influenced by those to a significant extent. The specific provisions for Bermuda, the Cayman Islands, Gibraltar and the Isle of Man have been set out, with detailed references to the appropriate regulatory sources in Chapters 23-26. Due to the central role of the MLC's Title 5 on compliance and enforcement, this is set out in full (in Part VIII, Appendix 1), annotated with references to the relevant sections of the ILO's guidelines on flag state control and port state control. The full text of the amendments to the MLC have been set out in Part VIII, Appendix 2.

Tells the story of how, with the help of two inspiring science teachers, four undocumented Mexican immigrants in Arizona put together an underwater robot from scavenged parts and went on to win the National Underwater Robotics Competition at UC Santa Barbara.

Each chapter of Chord Progressions For Songwriters provides a comprehensive self-contained lesson on one of twenty-one popular chord progressions that every songwriter should know inside and out. Lessons cover ascending, basic (I-IV), blues, circle (VI-II-V-I), classic rock (I-bVII-IV), combination, descending, doo-wop (I-VIm-IV-V), ending, flamenco (Im-bVII-bVI-V), folk (I-V), introduction, jazz (IIm-V-I), minor blues, one-chord, pedal point, rock and roll (I-IV-V), standard (I-VIm-IIIm-V), and turnaround progressions as well as rhythm and Coltrane changes. You will learn how key, duration, substitution, variation (adding or subtracting chords), and displacement (rearranged chord orders) are used to vary the sound of each progression. You will also take a look at the author's songwriter's notebook and work through exercises to reinforce key chapter concepts and get you started building your own progressions.
