Hans Gmoser (1932-2006) was the most influential mountaineer in Canada of the last fifty years. Through innovation, hard work, perseverance and an appetite for adventure, Gmoser evolved from penniless immigrant to mountain guide for kings, queens and prime ministers. He also played a major role in creating what is now western Canada's dynamic mountain adventure community. Known primarily as the inventor of heli-skiing and the founder of Canadian Mountain Holidays (CMH), Gmoser also garnered recognition as a talented rock climber, tireless expedition leader, successful mountain guide, renowned filmmaker, community organizer and vibrant businessman. Told from all aspects of his fascinating life and including some of Gmoser's own words, Chic Scott weaves together a compelling story based on the diaries, expedition journals, film commentaries and personal correspondence of this charismatic and inspiring figure."--

Steenburgh also examines ski and snowboard regions beyond Utah, making this book a meteorological guide to mountain weather and snow climates around the world. Chapters explore mountain weather, avalanches and snow safety, historical accounts of weather events and snow conditions, and the basics of climate and weather forecasting. Steenburgh explains what creates the best snow for skiing and snowboarding in accurate and accessible language and illustrates his points with 150 color photographs, making *Secrets of the Greatest Snow on Earth* a helpful tool for planning vacations and staying safe during mountain adventures.
