Design Development. Product Development is the process of turning an idea into a working product, ready for manufacture that has the best chance of success in the marketplace. Complete Fabrication has an expert team of CAD technicians, prototype engineers and model makers who can do this with you and your concept. We cover a broad range of market sectors including medical equipment, consumer products, industrial equipment and high-end audio.

after comparing and analyse the existing solar powered UAVs that has to be used in variety of applications as for military as well as commercial purposes. The aircraft design developed is a light and low drag flying wing configuration with solar cells as major power source. The Book includes the conceptual and detail design of the aircraft with stability, propulsion, performance, structural and fluid analysis, and also the fabrication of a prototype flying model for the demonstration and verification of the concept.
