Sometimes, getting over pain and betrayal means Getting Up, Getting Even and Getting a Better Man! Astrid has planned out her perfect wedding. That is before she found out that her fiancé, Bryan, is cheating on her with her cousin-slash-best-friend-slash-maid-of-honor, Geena. Worse, Bryan got Geena pregnant. Just when Astrid thought it couldn't get any worse, she received an invitation telling her that her Fairy Tale wedding will happen exactly the way she planned it. Except that she is no longer going to be the bride! So when her parents urged her to attend the wedding "as family," she planned the perfect revenge. She hired Ryder, the smoking hot bartender she met, to pretend to be the perfect Prince Charming—rich, smart and totally in love with her. Ryder pulled off the role quite well. And soon, everybody thought Astrid was really with a smoking hot guy who wears expensive suits on a daily basis, drives a luxurious sports car, and is totally in love with her. Ryder pulled off the role quite well. And soon, everybody thought Astrid was really with a smoking hot guy who wears expensive suits on a daily basis, drives a luxurious sports car, and is totally in love with her. Astrid invented the perfect guy every girl would kill to date, and every ex-boyfriend would hate to be compared with. Or did she really just invent him? What if she really did kiss a frog and tamed a beast? And her quest for revenge was really the start of her happily ever after?

Collection of original essays by leading researchers on current approaches to moral philosophy.

Offers the view that only an interdisciplinary view grounded in the impartial method of scientific inquiry can hope to develop moral principles and rules of action appropriate to today's world. Daleiden, a lecturer and author, argues that only a scientific understanding of human nature in conjunction with a rigorous empirical analysis of human behavior and its consequences can provide a basis for formulating sets of norms best suited to society's needs. He reviews various systems of ethics, from those proposed by the ancient Greeks to the theories of 20th-century thinkers, in his discussion of modern ethical issues such as abortion, capital punishment, euthanasia, drug use, sexual behavior, and pornography. This self-contained book is an up-to-date description of the basic theory of molecular gas dynamics and its various applications. The book, unique in the literature, presents working knowledge, theory, techniques, and typical phenomena in rarefied gases for theoretical development and application. Basic theory is developed in a systematic way and presented in a form easily applied for practical use. In this work, the ghost effect and non-Navier – Stokes effects are demonstrated for typical examples—B énard and Taylor – Couette problems—in the context of a new framework. A new type of ghost effect is also discussed.
