You must add refrigerant to the catalog before you can use the refrigerant tracking system. There are two steps to getting your refrigerant into the system. a. Add a product category called Refrigerant b. Add the refrigerant types you use to the Product Catalog To add the Refrigerant category: (1) Choose Products from the Materials menu.

In Photography and Anthropology, Christopher Pinney presents a provocative and readable account of the strikingly parallel histories of the two disciplines, as well as a polemical narrative and overview of the use of photography by anthropologists from the 1840s to the present. Walter Benjamin suggested that photography "make[s] the difference between technology and magic visible as a thoroughly historical variable," and Pinney here explores photography as a divinatory practice that prompted anthropologists to capture the "primitive" lives of those they studied. Early anthropology celebrated photography as a physical record, whose authority and permanence promised an escape from the lack of certainty in speech. But later anthropologists faulted photography for failing to capture movement and process. Anthropology as a practice of "being there" has thus found itself entwined in an intimate engagement with photography as metaphor for the collection of evidence. Through numerous examples from the annals of anthropological photography, Photography and Anthropology examines the history of anthropology's enchantment with photography alongside the anthropological theory of photography and documentation.

A chronicle of the life and career of the rapper Tupac Shakur, which offers a collection of previously unpublished interviews, writings, and private photographs that provide a portrait of the influential late musician.

This handbook acquaints readers with the exciting developments in various areas of cyanobacterial research in the backdrop of the publication of complete genome sequence of the cyanobacterium *Synechocystis* sp. strain PCC 6803 in 1996. It begins with a summary of the current knowledge on the taxonomy, phylogeny and evolution of cyanobacteria followed by the sequenced genomes, differentiation of kinetes and heterocyst. The book considers mechanisms of cellular movements (gliding, swimming and twitching motions) exhibited by various cyanobacteria in order to adjust to their environmental niches and the operation of the circadian rhythms. It covers cyanobacterial symbiosis, cyanophages and cyanobacterial toxins, followed by a discussion on stress responses (salinity, temperature, desiccation and oxidation). A comprehensive account on the developments in all these spheres has been presented in a lucid style with the required background information, molecular techniques employed and models proposed. This handbook constitutes the first such book written by a single author at a level and depth for graduate and research students in botany and microbiology.

In this twisted, page-turning novel from #1 New York Times bestselling author Lisa Jackson, a woman searching for her missing twin discovers the darker side of her family's history . . . Sisters share a bond—twins especially. For Maggie McCrae and Mary Theresa, that link once allowed them to communicate no matter how much distance separated them. But there were differences between them too. Maggie has always been the paler, quieter version of her wild and glamorous sister. Mary Theresa, adopting the name Marquise, has become a TV star, while Maggie is building a new life in small-town Idaho after her husband's death, and wrangling a resentful teenage daughter. But when Mary Theresa disappears, their connection reignites, and Maggie knows with certainty that her twin is in real danger. Thane Walker, the man Maggie loved until Mary Theresa lured him away, is her best hope of learning the truth—if Maggie can bring herself to trust him. But the deeper she digs, unraveling the layers of her sister's life, the more she discovers about her own complicated past. A legacy of deceit and betrayal has brought Maggie within a hair's breadth of a killer—one intent on revenge at any price . . .

From the internationally bestselling author of four books, including *The Opposite of Me*, a vibrant, compulsively readable novel about two married couples who pursue a dream to open a bed-and-breakfast in small-town Vermont. In her previous works including *The Best of Us*, "rising star" (Library Journal) Sarah Pekkanen captivated readers by penning "refreshingly introspective, sharply realistic, and tenderly humorous" novels (Booklist) that had readers "flying through the pages" (Hoda Kotb, Today show). Now, in *Catching Air*, Pekkanen turns an unflinching eye on the tangled relationships of two pairs of thirty-somethings. A chance to run a B&B in snowy, remote Vermont—it's an offer Kira Danner can't resist after six soul-crushing years of working as a lawyer in Florida. As Kira and her husband, Peter, step into a brand new life, she quells her fears about living with the B&B's co-owners: Peter's sexy, irresponsible brother Rand, and Rand's wife, Alyssa—who is essentially a stranger. For her part, Alyssa sees taking over the B&B as the latest in a string of adventures. Plus, a quiet place might help her recover from the news that she can't bear children. But the idyllic town proves to be anything but serene: Within weeks, the sisters-in-law are scrambling to prepare for their first big booking—a winter wedding—and soon a shy, mysterious woman comes to work for them. Dawn Zukoski is hiding something; that much is clear. But what the sisters-in-law don't realize is that Dawn is also hiding from someone. Relatable and dynamic, *Catching Air* delves deeply into the vital relationships that give shape to women's lives.

Widowed midwife Sarah Brandt teams up with Detective Sergeant Frank Malloy to investigate the murder of her late husband, Dr. Tom Brandt, but what they discover could destroy Sarah, as well as Malloy's hopes for building a new future with her.

Until recently, Zoey Redbird was an average high-school student worrying about grades, boys, and breakouts. But priorities have a way of changing when you are Marked as a vampire, enroll in the vampire academy House of Night, and have to figure out a whole new social hierarchy, affinities for elemental magic, and physiological changes that make you crave blood. The magical world of *New York Times*_ best-selling authors P. C. Cast and Kristin Cast comes to comics! Over 12 million copies sold to fans in the U.S. with legions of loyal fans worldwide.

Alone after her village is destroyed by Leatherwings, young Melora and her father's horse, Sky, survive on their own with a herd of wild horses until she finds a new home with a civilization of centaurs.

The right-brain way to conquering clutter, mastering time, and reaching one's goals: the first book to show creative people how to arrange their desks, their time, and their lives in a style consistent with their unique way of perceiving the world. Suggests a host of practical solutions, all in harmony with the way creative people think and act. 20 line drawings.

Viola doesn't want to go to boarding school, but somehow she ends up at Prefect Academy, an all-girls school in South Bend, Indiana, far faraway from her home in Brooklyn, New York. Now Viola is stuck for a whole year in what seems to be the sherbet-coloured-sweater capital of the world. Ick. There's no way Viola's going to survive the year - especially since she has to replace her BFFAA (best friend forever and always) Andrew with three new roommates who, disturbingly, actually seem to likebeing at Prefect. She resorts to viewing the world (and hiding) behind the lens of her video camera. But boarding school, her roommates and even Indiana, are nothing like Viola thought they would be, and she soon realizes that she may be in for the most incredible year of her life. But first she has to put the camera down and let the world in.
