Local government innovation has become one of the most important topics on China's policy agenda in recent decades. This book explains why some local governments are more innovative than others. This book uses a novel theoretical framework and points out that in China's multi-level government structure, the administrative hierarchy and the span of control could shape local governments' innovation motivation, innovation capability, and innovation opportunity, thus influencing local government innovativeness. The author systematically analysed the 177 winners and finalists of the biennial Innovations and Excellence in Chinese Local Governance (IECLG) Awards Programme from 2001 to 2015 to provide convincing empirical evidence to support this theory. This book adopts an institutional approach to explaining local government innovativeness in China and may be a useful reference to help us learn more about local government decisions and behaviours.

This accessible text summarizes and explains the structure of British local government, focusing on key changes introduced during the Thatcher/Major years and initiatives implemented by the current Labour administration. While offering a detailed discussion of these policies, the book examines how local government has sought to respond in a proactive way to a range of important social, political and economic changes. Readers are introduced to local

government as a lively and complex site of political engagement. British local government is set in a wider political, social and theoretical context. Throughout, the authors argue that the attempt by the Thatcher and Major administrations of 1979-97 to push local government into the role of merely administering centrally defined policies was largely short-circuited. While outlining and explaining these changes and their effects, the authors argue that far from being defenceless victims of central government, local authorities devised numerous strategies to protect their independent policy-making role. The authors go on to examine the proposals for change introduced by the Labour government and assess their implications for local government in the twenty-first century. This book will be essential reading for lecturers and students of local government, politics, public policy and urban policy, as well as practitioners.

Western democracies have retained political legitimacy since 1945 by a continuous process of adaptation to changing socio-political circumstances. Most states have changed their institutional arrangements, and reorganized their systems of local government to some degree. This book explains local government change within the wider context of institutional change. It links theories of legitimacy and institutional change to the extensive empirical and historical literature on local government reorganization. It also differentiates between institutional change and reform. Structural or historical variables are shown to play a major role in explaining why and how both reform and change take place. In particular, the rise and decline of the welfare state - and the political and policy changes associated with this - is one of the most important points of departure in the analysis. The ideas shared by the policy community explain the roles played by actors involved in shaping local government change and reform. This provides the link between the macro (structural) dimension and empirical observation.
