Facilitating the transition from KS2 to KS3

All teachers are meeting more pupils with special needs in mainstream classrooms. Although there are general issues to be aware of subject specialists will always want specific guidance and examples. This series combines SEN expertise with subject knowledge to produce practical and immediate support. Covers: * Policy writing and how to do it * Simply explanation of SEN labels * Creating an inclusive classroom environment * Working with TA's

This book is a comprehensive guide to qualitative comparative analysis (QCA) using R. Using Boolean algebra to implement principles of comparison used by scholars engaged in the qualitative study of macro social phenomena, QCA acts as a bridge between the quantitative and the qualitative traditions. The QCA package for R, created by the author, facilitates QCA within a graphical user interface. This book provides the most current information on the latest version of the QCA package, which combines written commands with a cross-platform interface. Beginning with a brief introduction to the concept of QCA, this book moves from theory to calibration, from analysis to factorization, and hits on all the key areas of QCA in between. Chapters one through three are introductory, familiarizing the reader with R, the QCA package, and elementary set theory. The next few chapters introduce important applications of the package beginning with calibration, analysis of necessity, analysis of sufficiency, parameters of fit, negation and factorization, and the construction of Venn diagrams. The book concludes with extensions to the classical package, including temporal applications and panel data. Providing a practical introduction to an increasingly important research tool for the social sciences, this book will be indispensable for students, scholars, and practitioners interested in conducting qualitative research in political science, sociology, business and management, and evaluation studies.

This exciting new edition of a popular book offers the reader the following new elements: - explicit advice on how to link science to cross-curricular learning - updated advice on planning and assessment - guidance on how to accommodate personalised learning within science - more on games to use in science - more on creativity - more on questioning techniques, an important aspect of scientific enquiry - a whole new chapter on using ICT to teach science. There are lots of practical examples, and clear guidance on how to turn theory into creative and lively science lessons and activities. Examples of children's work are included, and there are plenty of helpful case studies. Hellen Ward is Senior Lecturer at Canterbury Christ Church University, a widely-published author and a frequent presenter at conferences. Judith Roden is Principal Lecturer at Canterbury Christ Church University, and a successful author. Claire Hewlett and Julie Foreman are both Senior Lecturers at Canterbury Christ Church University.
