His introduction to film came as a teenager when he served as a censor for movies shown at the kibbutz, editing films for ... So I saw television as a way to practice until I did cinema again. " ...

Designed for the novice or for a course in film editing, the book is the perfect introductory text. Editing is the art of using the building blocks supplied by the writer and director to create a structurally sound and brilliant piece of cinematic dazzle. As the word is to the sentence, so the shot is to the scene, and the editor must "write" coherently. This book teaches the aspiring editor how to speak the inspiring language of images. For projects, it covers the latest version of Final Cut Express, contains structured exercises, and uses video clips on the companion DVD, to allow the reader to apply the lessons of the book in clear and entertaining ways. Solutions to exercises and PowerPoint slides are available to instructors.

The first-ever comprehensive examination of the film editor's craft from the beginning of cinema to the present day. Of all the film-making crafts, editing is the least understood. Using examples drawn from classic film texts, this book clarifies the editor's role and explains how the editing process maximises the effectiveness of the filmed material. Traces the development of editing from the primitive forms of early cinema through the upheavals caused by the advent of sound, to explore the challenges to convention that began in the 1960s and which continue into the twenty-first century. New digital technologies and the dominance of the moving image as an increasingly central part of everyday life have produced a radical rewriting of the rules of audio-visual address. It is not a technical treatise; instructive and accessible, this historically-based insight into filmmaking practice will prove invaluable to students of film and also appeal to a much wider readership.

Film and Video Editing Theory offers an accessible, introductory guide to the practices used to create meaning through editing. In this book, Michael Frierson synthesizes the theories of the most prominent film editors and scholars, from Herbert Zettl, Sergei Eisenstein, and Noël Burch to the work of landmark Hollywood editors like Walter Murch and Edward Dmytryk. In so doing, he maps out a set of craft principles for readers, whether one is debating if a flashback reveals too much, if a certain cut clarifies or obscures the space of a scene, or if a shot needs to be trimmed. The book is grounded in the unity of theory and practice, looking beyond technical proficiency in a specific software to explain to readers how and why certain cuts work or don ' t work.

The Technique of Film & Video Editing provides a detailed, precise look at the artistic and aesthetic principles and practices of editing for both picture and sound. Analyses of photographs from dozens of classic and contemporary films and videos provide a sound basis for the professional filmmaker and student editor. This book puts into context the storytelling choices an editor will have to make against a background of theory, history, and practice. This new edition has been updated to include the latest advances in digital video and nonlinear editing and explores the new trend of documentary as mainstream entertainment, using films such as "Fahrenheit 9/11" and "The Fog of War" as examples.

On film editing

Editing and Montage in International Film and Video presents a theoretical and practical approach to the art of editing. In this book, Luis Fernando Morales Morante explores the international history, technology, theory, practical techniques, psychology, and cognitive effects of editing across a range of media from around the world, featuring case studies from film, dramatic television, news media, music videos, commercials, and mobile-delivered formats, from the films of Sergei Eisenstein to Michael Jackson's "Thriller" to coverage of the 2012 U.S. presidential elections. The book includes self-study exercises throughout to help readers put theory into practice.

On Film Editing explains, in simple terms, the principles of film editing, using examples and anecdotes. Written in an informal "how-to-do-it" style, renowned director Edward Dmytryk shares his expertise and experience in film editing in an anecdotal and philosophical way. In On Film Editing, Dmytryk contends that many technicians and professionals on the film crew-- from the cameraman and his assistants to the producer and director-- must understand film editing to produce a truly polished work. In this book he explains in layman's terms the principles of film editing, using examples and anecdotes from almost five decades in the film industry.

How does a film editor make decisions about where and when to cut in order to make a film 'feel right'? Generally speaking, the answer is, 'it's intuitive', which is accurate but leaves one wanting to know more. Cutting Rhythms breaks down the definition of intuition to find that, even if rhythmic thinking is intuitive thinking, we can still say more than we 'just know.' This book offers possibilities rather than prescriptions. It presents questions an editor or filmmaker can ask themselves about their work, and a clear and useful vocabulary for working with those questions. Cutting Rhythms makes ideas about rhythm in film editing clear and accessible, so that you can do more than just imitate editing you've seen on TV. With this book you'll develop your own sense of rhythm, refine our rhythmic shaping skills, and increase your creativity--and in so doing, become a better filmmaker.

Documentary Editing offers clear and detailed strategies for tackling every stage of the documentary editing process, from organizing raw footage and building select reels to fine cutting and final export. Written by a Sundance award- winning documentary editor with a dozen features to his credit and containing examples from over 100 films, this book presents a step-by-step guide for how to turn seemingly shapeless footage into focused scenes, and how to craft a structure for a documentary of any length. The book contains insights and examples from seven of America ' s top documentary editors, including Geoffrey Richman (The Cove, Sicko), Kate Amend (The Keepers, Into the Arms of Strangers), and Mary Lampson (Harlan County U.S.A.), and a companion website contains easy-to-follow video tutorials. Written for both practitioners and enthusiasts, Documentary Editing offers unique and invaluable insights into the documentary editing process.

This classic in film theory, presents a systematic study of the techniques of the film medium and of their potential uses for creating formal structures in individual films such as Dovzhenko's Earth, Antonioni's La Notte, Bresson's Au Hasard Balthazar, Renoir's Nana, and Godard's Pierrot le Fou. Originally published in 1981. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
