At the end of World War II, the vast majority of people in France, living in small towns or rural areas, had suffered through a series of traumas - economic depression, war and occupation, the absence of millions of POWs, deportees and forced laborers, widespread destruction. The resulting disruptions continued to reverberate in families for several years after the Liberation. In the decades following the war, France experienced radical economic and social transformations, becoming an urban, industrial, affluent nation. In less than thirty years, French ideas about gender and family life underwent dramatic changes. This book provides a broad view of changing lives and ideas about love, courtship, marriage, giving birth, parenting, childhood, and adolescence in France from the Vichy regime to the sexual revolution of 1960s. To understand how such changes influenced ideas about family life, from Vichy to the Sexual Revolution explores inexpensive guide books on marriage, childbirth and parenting, advice columns and popular magazines directed at readers from a variety of backgrounds. Sarah Fishman puts these sources into context, by exploring juvenile court family case studies. She links economic and social changes to the evolution of thinking about gender, the self, and the family, throwing new light on the emergence of a new vision of the family, one based on dynamic relationships rather than a set structure.

This book explores the phenomenon of Independence Days. These rituals had complex meanings both in the territories concerned and in Britain as the imperial metropole, where they were extensively reported in the press. The text is concerned with the political management, associated rhetoric and iconography of these seminal celebrations. The focus is therefore very much on political culture in a broad sense, and changing perceptions and presentations over time. Highlights of the book include an overview by David Cannadine relating the topic to ornamentalism, invented tradition and transitions in British culture. Although the book is mainly concerned with the British Empire, Martin Shipway - a leading historian and cultural analyst of French decolonization - contributes an acute summary of how the same "moment" was handled differently in the other great European empires. There are detailed and lively studies by noted specialists of the immediate coming of Independence to India/Pakistan, Malaya, Ghana, Zimbabwe, and Guyana. The book includes a thematic focus on the important role of representatives of the British monarchy in legitimating transfers of sovereignty at their point of climax. This book was published as a special issue of The Round Table.
