Includes a multilingual glossary in French, German, Russian and Spanish.

Arthur Clifford Howard was a great Australian inventor and manufacturer of farming equipment. In 1912 he built a prototype rotavator powered by a motorcycle engine. Owners of large wheat farms expressed interest but only if he could create a machine that could match or better the work of horse teams. By 1922 his first tractor was demonstrated. He got orders for 6 machines. Working initially from Moss Vale, the Austral Auto Cultivators was registered. He also produced rotary hoe attachments for Fordson tractors. In 1927 the business moved to Northmead. 1926 saw the production of the A16 tractor. In 1927 the revolutionary walk-behind rotary hoe joined the production line. The company grew, DH16 tractor, DH22, and in 1937 the FWDH22 models were produced. 1953 saw the Kelpie tractor, with a variety of implements including the dozer blade, tipping trailer, disc harrows, tool bar, mouldboard plough and spray pack. Later models introduced the underbelly slasher, spring tyne cultivator, rear grader blade and field roller. -...low cost garden tractor that will find a place with every market

gardener, poultry farmer and small orchardist- as the advertising blurb read. When the factory was closed in 1985 anything that was left was written off and dumped, including valuable literature and information on the machines. Shane Djuric is an expert on Howard Tractors and rotavators. His interest began as a child clambering over his grandfather's retired Kelpie garden tractor on their property in the Hawkesbury. He restored his first Howard tractor he realised there was a dearth of information about the brand. Robert Moore, another enthusiast, had started a Register of Howard Machinery, so that others could share knowledge and learn more. Shane began taking his growing collection to vintage machinery shows with Robert and other Register members, gathering information about machinery and the history of the company. Shane writes -This book has been done to cover the most frequently asked questions in regards to what model tractor had which particular features, and as this information has helped me, I now hope that it may help you.- Photographs illustrate the various tractors and details are given to help identify each model. Throughout there are contemporary advertisements for the various tractors. Howard Tractors are a part of Australia's manufacturing and agricultural history. Enthusiasts such as Shane Djuric are ensuring their name lives on.

To keep her small family together, Isobel Barrington managed to make ends meet—just!—by doing private nursing jobs. Her mother had only a small pension and her younger brother had to be educated somehow. Isobel really shouldn't have had time to fall in love with Dr. Thomas Winters—but she did anyway. Unfortunately, he wasn't likely to be interested in her when the lovely Ella Stokes was around, so Isobel ought to try to forget him. Easier said than done!

The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.
