Aldous Huxley wrote this just before he died and to me this is his swan song. Island is set somewhere in the Pacific and depicts an Englishman's journey of spiritual enlightenment and self discovery. A progressive community takes mind-altering drugs and rejects conventional societal values for their own utopia.

Sometimes, the books of an author's old age comment on or continue the work of their younger years. Almost everyone knows how Aldous Huxley thought the world might go wrong from his 1932 Brave New World; less often read is his description of a (doomed) utopian society in Island, published thirty years later and not long before he died. Huxley describes for us a peaceable kingdom on the island ...

Seminar paper from the year 2006 in the subject English Language and Literature Studies - Literature, grade: 1,3, University of Hamburg (Insitut für Anglistik), course: „Alternate Worlds“: Utopian and Counterfactual English Fiction from the late 19th Century to the 1990's, language: English, abstract: 1. Introduction (...) *Island* is a novel of ideas, light on the novel-part and heavy on the ideas. In fact it could also be seen as an essay with a bit of a plot entangled around it. The plot in any case is secondary and easy to summarize: The English journalist Will Farnaby is stranded on the island of Pala and is on the secret mission to negotiate a contract for oil. Injured in the beginning, he leads long conversations with some inhabitants through which he learns about the Palanese way of life. As he takes pleasure in their virtues and beliefs, he gives up his initial oil plans. Nevertheless, in the end Pala gets invaded by the neighbour island Rendang. The emphasis in *Island* lies in the long conversations that Will leads in which he learns about the Palanese lifestyle and through which we, the readers, get to know about Huxley's ideas of an ideal society. The questions this research paper deals with are: What exactly are the utopian features in *Island*? Are those features attainable and what is more, are they worth to attain at all? And in this context, is *Island* rather a utopia of escape or reconstruction? In order to find out the answers to these questions, the paper will first offer an analysis of the ideas and then it will turn to the 'novel'-part with an analysis of the main plot.

When Aldous Huxley's *Brave New World* first appeared in 1932, it presented in terms of purest fantasy a society bent on self-destruction. Few of its outraged critics anticipated the onset of another world war with its Holocaust and atomic ruin. In 1948, seeing that the probable shape of his anti-utopia had been altered inevitably by the facts of history, Huxley wrote *Ape and Essence*. In this savage novel, using the form of a film scenario, he transports us to the year 2108. The setting is Los Angeles where a "rediscovery expedition" from New Zealand is trying to make sense of what is left. From chief botanist Alfred Poole we learn, to our dismay, about the twenty-second-century way of life. "It was inevitable that Mr. Huxley should have written this book: one could almost have seen it since Hiroshima is the necessary sequel to *Brave New World*."—Alfred Kazin. "The book has a certain awesome impressiveness; its sheer intractable bitterness cannot but affect the reader."—Time.

Huxley's final novel, set on an imagined tropical island named Pala. Will Farnaby, a journalist, wants to visit the island, not normally open to outsiders, but arranges to be shipwrecked on it. His secret agenda is to gain access to the island's oil reserves, but once he is on the island and sees how people live, his priorities change.

The visionary legacy of Aldous Huxley is as relevant today as ever. Huxley possessed a sober understanding of the human condition as well as an inspired vision of the human potential. This volume presents an interdisciplinary examination and appreciation of Aldous Huxley's three visionary novels – Brave New World (1932), Ape and Essence (1948), and Island (1962) – to reveal the extent to which Huxley's prognoses into our possible futures was prophetic. The author assesses each novel to reveal the foresights that define our current educational, social, religious, political, and economic institutions, while also exposing our conflicts within those institutions. This volume examines the educational, cultural and technological changes that have shaped our society since Huxley's work, with special reference to the enduring legacy of educational philosopher John Dewey. It offers profound insights into the educational forces and moral foundations of our society that shape us, both inside and outside of our schools. It is the first of its kind to focus exclusively on all three of Huxley's visionary novels and detail their relevance to our world today.

Brave New World author Aldous Huxley on enlightenment and the "ultimate reality" In this anthology of twenty-six essays and other writings, Huxley discusses the nature of God, enlightenment, being, good and evil, religion, eternity, and the divine. Huxley consistently examined the spiritual basis of both the individual and human society, always seeking to reach an authentic and clearly defined experience of the divine. Featuring an introduction by renowned religious scholar Huston Smith, this celebration of "ultimate reality" proves relevant and prophetic in addressing the spiritual hunger so many feel today.
