Presents illustrated lyrics to thirteen classic children's songs, with an accompanying music CD.

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1975.

Since its founding in 1964, the United Republic of Tanzania has used music, dance, and other cultural productions as ways of imagining and legitimizing the new nation. Focusing on the politics surrounding Swahili musical performance, Kelly Askew demonstrates the crucial role of popular culture in Tanzania's colonial and postcolonial history. As Askew shows, the genres of ngoma (traditional dance), dansi (urban jazz), and taarab (sung Swahili poetry) have played prominent parts in official articulations of "Tanzanian National Culture" over the years. Drawing on over a decade of research, including extensive experience as a taarab and dansi performer, Askew explores the intimate relations among musical practice, political ideology, and economic change. She reveals the processes and agents involved in the creation of Tanzania's national culture, from government elites to local musicians, poets, wedding participants, and traffic police. Throughout, Askew focuses on performance itself—musical and otherwise—as key to understanding both nation-building and interpersonal power dynamics.

A companion volume to Stern's Guide to Contemporary African Music Volume I. Since then the World Music phenomenon of the last few years has created multiple new demands for African music - through recordings, live performances and for information and analysis. This new book digs deeper into the African musical past highlighting new areas of interest and bringing the story up to date.

Explores the impact of hip hop on culture worldwide.

The study of narrative—the object of the rapidly growing discipline of narratology—has been traditionally concerned with the fictional narratives of literature, such as novels or short stories. But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual. In this volume, which provides a companion piece to Tobias Klauk and Tilmann Köppe's *Fiktionalität: Ein interdisziplinäres Handbuch*, the use of narrative to convey true and reliable information is systematically explored across media, cultures and disciplines, as well as in its narratological, stylistic, philosophical, and rhetorical dimensions. At a time when the notion of truth has come under attack, it is imperative to reaffirm the commitment to facts of certain types of narrative, and to examine critically the foundations of this commitment. But because it takes a background for a figure to emerge clearly, this book will also explore nonfactual types of narratives, thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology.

When agents Valerian and Laureline arrive in 1986 New York to intercept Galaxy's worst megalomaniac, they find the world in ruins and the city about to sink into the ocean.
