fractures, holes, delaminations, core problems, large holes, and keels

When the terrorist attacks struck New York City on September 11, 2001, boat operators and waterfront workers quickly realized that they had the skills, the equipment, and the opportunity to take definite, immediate action in responding to the most significant destructive event in the United States in decades. For many of them, they were “doing what needed to be done.” American Dunkirk shows how people, many of whom were volunteers, mobilized rescue efforts in

various improvised and spontaneous ways on that fateful date. Disaster experts James Kendra and Tricia Wachtendorf examine the efforts through fieldwork and interviews with many of the participants to understand the evacuation and its larger implications for the entire practice of disaster management. The authors ultimately explore how people—as individuals, groups, and formal organizations—pull together to respond to and recover from startling, destructive events. American Dunkirk asks, What can these people and lessons teach us about not only surviving but thriving in the face of calamity?

As research on the human, animal, plant and microbial genomes matures towards descriptive fullness, the need for understanding the proteome has clearly emerged as the next major endeavor of life sciences. Proteomics - the quantitative analysis of all proteins working in a cell at a specific time and at specific conditions - provides deep insight into the highly organized network of expression, modification and degradation of proteins. Compiled in this book are reviews and research articles which describe the

Forecasting the Environmental Fate and Effects of Chemicals is the first book to address specifically the issue of forecasting in environmental toxicology and chemistry from a methodological, regulatory and practical perspective. It is becoming increasingly important for environmental toxicologists and chemists to be able to forecast the fate and effects of chemicals by using existing information to predict the future. Providing a unique and timely opportunity for active researchers and students to obtain in a single volume the 'state of the art' in this expanding field,
