“[Niebuhr] is one of my favorite philosophers. I take away [from his works] the compelling idea that there's serious evil in the world, and hardship and pain. And we should be humble and modest in our belief we can eliminate those things. But we shouldn't use that as an excuse for cynicism and inaction. I take away . . . the sense we have to make these efforts knowing they are hard.”—President Barack Obama Forged during the tumultuous but triumphant postwar years when America came of age as a world power, The Irony of American History is more relevant now

than ever before. Cited by politicians as diverse as Hillary Clinton and John McCain, Niebuhr's masterpiece on the incongruity between personal ideals and political reality is both an indictment of American moral complacency and a warning against the arrogance of virtue. Impassioned, eloquent, and deeply perceptive, Niebuhr's wisdom will cause readers to rethink their assumptions about right and wrong, war and peace. "The supreme American theologian of the twentieth century."—Arthur Schlesinger Jr., *New York Times* "Niebuhr is important for the left today precisely because he warned about America's tendency—including the left's tendency—to do bad things in the name of idealism. His thought offers a much better understanding of where the Bush administration went wrong in Iraq."—Kevin Mattson, *The Good Society* "Irony provides the master key to understanding the myths and delusions that underpin American statecraft. . . . The most important book ever written on US foreign policy."—Andrew J. Bacevich, from the Introduction

What can football among young men in Jamaica tell us about class, wealth, age, and concepts of masculinity? William Tantam presents an ethnographic study of the impact of football on men's lives in contemporary Jamaica. He illuminates how the football field relates to social and economic inequalities, and whether playing football in a mixed group has the effect of levelling the playing field between the more and less economically wealthy. Tantam presents insights into the life histories and football biographies of individuals, the relationship between wealth, education, and class, and explores how socioeconomic inequalities are embodied and enacted. With rich ethnographic detail, he analyses how the experience of watching international football matches and the English Premier League locates groups of spectators in relation to wider movements of capital. The book features case studies of individuals who play football in Jamaica, and penetrates an under-examined area in academic discussion of sport and masculinity. This will be a valuable addition to students of anthropology, sociology, football studies, cultural studies and gender studies.

The massacre of Aboriginal people at Myall Creek marked a critical point in the

struggle over land and power between the indigenous peoples of Australia and the European invaders. It resulted in seven white men being hanged for their crimes - the last ever to hang for the murder of Aboriginal people. Massacre at Myall Creek, by playwright John Summons, helps students to explore the social and political climate surrounding the massacre. As well as the play, the book contains comprehensive study units, making it an excellent resource for students of Drama, English, History and Social Studies. Among other issues, it deals with displacement, racism, authority, justice, capital punishment and personal responsibility.

These notes are based on the course of lectures I gave at Harvard in the fall of 1964. They constitute a self-contained account of vector bundles and K-theory assuming only the rudiments of point-set topology and linear algebra. One of the features of the treatment is that no use is made of ordinary homology or cohomology theory. In fact, rational cohomology is defined in terms of K-theory. The theory is taken as far as the solution of the Hopf invariant problem and a start is made on the J-homomorphism. In addition to the lecture notes proper, two papers of mine published since 1964 have been reproduced at the end. The first, dealing with operations, is a natural supplement to the material in Chapter III. It provides an alternative approach to operations which is less slick but more fundamental than the Grothendieck method of Chapter III, and it relates operations and filtration. Actually, the lectures deal with compact spaces, not cell-complexes, and so the skeleton-filtration does not figure in the notes. The second paper provides a new approach to K-theory and so fills an obvious gap in the lecture notes.

This publication provides a comprehensive and practical guide for the design of stormwater pump station systems associated with transportation facilities. Guidance is provided for the planning and design of pump stations which collect, convey, and discharge stormwater flowing within and along the right-of-way of transportation systems. Methods and procedures are given for determining cumulative inflow, system storage needs, pump configuration and selection, discharge system size, and sump dimensions. Pump house features are identified and construction and maintenance considerations are addressed. Additionally, considerations for retrofitting existing storm water pump stations are presented.

As the Titanic and her passengers sank slowly into the Atlantic Ocean after striking an iceberg late in the evening of April 14, 1912, a nearby ship looked on. Second Officer Herbert Stone, in charge of the midnight watch on the SS Californian sitting idly a few miles north, saw the distress rockets that the Titanic fired. He alerted the captain, Stanley Lord, who was sleeping in the chartroom below, but Lord did not come to the bridge. Eight rockets were fired during the dark hours of the midnight watch, and eight rockets were ignored. The next morning, the Titanic was at the bottom of the sea and more than 1,500 people were dead. When they learned of the extent of the tragedy, Lord and Stone did everything they could to hide their role in the disaster, but pursued by newspapermen, lawyers, and political leaders in America and England, their terrible secret was eventually revealed. The Midnight Watch is a fictional telling of what may have occurred that night on the SS Californian, and the resulting desperation of Officer Stone and Captain Lord in the aftermath of their inaction. Told not only from the perspective of the SS Californian crew, but also through the eyes of a family of third-class passengers who perished in the disaster, the narrative is drawn together by Steadman, a tenacious Boston

journalist who does not rest until the truth is found. David Dyer's *The Midnight Watch* is a powerful and dramatic debut novel--the result of many years of research in Liverpool, London, New York, and Boston, and informed by the author's own experiences as a ship's officer and a lawyer.
