This new edition of a textbook first published in 2000 provides a comprehensive account of the law of treaties from the viewpoint of an experienced practitioner. As such, it is the first, and only, book of its kind. Aust provides a wealth of examples of the problems experienced with treaties on a daily basis, not just when they are the subject of a court case. He explores numerous precedents from treaties and other related documents, such as memorandums of understanding (MOUs), in detail. Using clear, accessible language, the author covers the full extent of treaty law, drawing examples from both treaties and MOUs. Modern Treaty

Law and Practice is essential reading for teachers and students of law, political science, international relations and diplomacy, who have an interest in treaties.

On the publication of its first edition, this textbook was welcomed as the definitive study of treaty law written from the viewpoint of an experienced practitioner. As with the first, this edition aims to provide the student and practitioner with a full understanding of the law and updates existing information and refines previous arguments. New to its scope of examination is the study of the use of memorandums of understanding (MOUs) in litigation, the treaty-making capacity of entities such as the Vatican, Taiwan and Palestine, and the effect of hostilities on treaties. An institutional perspective on realizing the responsibility to protect populations from genocide, war crimes, ethnic cleansing and crimes against humanity.

The book examines treaty law from the angle of types of motion, combining theory with practical examples and empirical data.

The rules of treaty interpretation codified in the 'Vienna Convention on the Law of Treaties' now apply to virtually all treaties, in an international context as well as within national legal systems, where treaties have an impact on a large and growing range of matters. The rules of

Treaty interpretation differ somewhat from typical rules for interpreting legal instruments and legislation within national legal systems.

Lawyers, administrators, diplomats, and officials at international organisations are increasingly likely to encounter issues of treaty interpretation which require not only knowledge of the relevant rules of interpretation, but also how these rules have been, and are to be, applied in practice. Since the codified rules of treaty interpretation came into decree, there is a considerable body of case-law on their application. This case-law, combined with the history and analysis of the rules of treaty interpretation, provides a basis for understanding this most important task in the application of treaties internationally and within national

systems of law. Any lawyer who ever has to consider international matters, and increasingly any lawyer whose work involves domestic legislation with any international connection, is at risk nowadays of encountering a treaty provision which requires interpretation, whether the treaty provision is explicitly in issue or is the source of the relevant domestic legislation. This fully updated new edition features case law from a broader range of jurisdictions, and an account of the work of the International Law Commission in its relation to interpretative declarations. This book provides a guide to interpreting treaties properly in accordance with the modern rules.

actors may often depend on whether or not the instrument which contains the norm is to be regarded as a treaty. In this study, the author argues that instruments which contain commitments are, "ex" "hypothesi," treaties. In doing so, he challenges popular notions proclaiming the existence of morally and politically binding agreements and so-called soft law'. Such notions, Klabbers argues, are internally inconsistent and founded upon untenable presumptions. Moreover, they find little support in the pertinent decisions of municipal and international courts and tribunals. The book addresses issues of importance not only for academics working in international law, constitutional law and political science, but also for practitioners involved in the making,
