However, I like to take a field guide with me, and in this respect this Phillipps' tome is somewhat larger than the two abovementioned. Again, fairly - but not overly - heavy, a substantial jacket pocket would be required to accommodate this guide, or, more likely in my case, it will spend a lot of time in the backpack.

Phillipps' Field Guide to the Mammals of Borneo (2nd) - JB...

Phillipps' Field Guide to the Mammals of Borneo and Their Ecology: Sabah, Sarawak, Brunei, and Kalimantan Quentin Phillipps and Karen Phillipps. This is the most comprehensive, up-to-date, and easily accessible field guide to the mammals of Borneo—the ideal travel companion for anyone visiting this region of the world.

Published to great critical acclaim in 2009 and with a 2nd edition in 2011, this is a fully revised and updated edition of the most user-friendly field guide to the birds of Borneo, covering Sabah, Sarawak, Brunei, and the Indonesian states of Kalimantan. The book gives descriptions of 669 species living or reported on the island, including 51 endemic species. These are superbly illustrated in 141 colour plates with more than 2,000 full colour bird images, including most of the sexual variants and immature forms of polymorphic species. Each plate is accompanied by species descriptions covering taxonomy, size, call, range, distribution, habits and status. Distribution is shown by detailed thumbnail maps. There are 7 habitat plates, 12 regional maps showing Borneo's top 130 birdwatching sites, fast-find graphic indexes to the birds of Kinabalu, and a full overview of vegetation, climate and ecology.

This is the most comprehensive, up-to-date, and easily accessible field guide to the mammals of Borneo—the ideal travel companion for anyone visiting this region of the world. Covering Sabah, Sarawak, Brunei, and Kalimantan, the book provides essential information on 277 species of land and marine mammals and features 141 breathtaking color plates. Detailed facing-page species accounts describe taxonomy, size, range, distribution, habits, and status. This unique at-a-glance guide also includes distribution maps, habitat plates, regional maps, fast-find graphic indexes, top mammal sites, and a complete overview of the vegetation, climate, and ecology of Borneo. Covers 277 species—from orangutans and clouded leopards to otters and other marine mammals Features 141 superb color plates Includes facing-page species accounts, distribution maps, fast-find graphic indexes, and more Describes Borneo ' s vegetation, climate, and ecology

This second edition lists all 669 bird species appearing in Borneo with accompanying distribution maps, describes the 52 species endemic to Borneo in detail, and includes over 2000 colour images.

Originally published under title: A field guide to the birds of Borneo: Singapore: Talisman, 2009.

Covering the whole of the island of Borneo, this fully revised and updated edition is indispensable for anyone interested in the avifauna of this diverse region. With authoritative text and packed with sumptuous colour plates, Birds of Borneo is the definitive guide to the island's birdlife. This new edition features an extensive introduction providing information on geography, climate and habitat. The accurate text covers the identification, voice and status of all species and distinctive subspecies of the island, which is accompanied by detailed distribution maps as well as 144 colour plates covering all major races and plumage variations.

China is one of the largest countries in the world, covering 7% of the earth's land surface, and encompassing a hugely diverse range of habitats. As a result it boasts a rich and diverse avifauna, including some of the most spectacular and fascinating birds to be found anywhere in the world. This is the first truly comprehensive, taxonomically modern, and fully illustrated field guide to the Chinese birds. Over 1300 species are illustrated in 128 colour paintings, and fully described in the text. Colour distribution maps are provided for all illustrated species. The authors have both lived and worked in the region for many years, and have extensive experience of writing and illustrating bird guides. This important book will be a landmark in field guide publishing.

Simultaneously published: Oxford: John Beaufoy Publishing.

The islands of Borneo, Sumatra, Java, and Bali are ecologically one of the richest, most biologically complex areas in the world, sought out by thousands of knowledgeable nature lovers every year for the spectacular variety of wildlife and beautiful vistas. This book provides the first complete identification guides to the birds of this teeming tropical paradise. It gives descriptions of 820 regional species, illustrated in 88 specially commissioned color plates accompanied by notes detailing distinctive features and habitats. Entries cover nomenclature, plumage, markings, voice, global range, distribution and regional status, habits, and diet. The main text gives practical information on where to find many exotic species, citing major birdwatching locations. Introductory chapters discuss habitats, climate, land-use, and conservation concerns. Professional ornithologists and amateur bird watchers alike will find this the indispensable bird guide for eastern Malaysia and western Indonesia for many years to come. It is also an unrivalled source of information for casual travellers and ecotourists.
