Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX® Examination is the only review book on the market with a focus on prioritization and management of care—just like the current NCLEX Examination itself! The workbook's unique approach establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment. **UNIQUE!** Emphasis on the NCLEX Management-of-Care Focus: LaCharity is the only workbook available that focuses on the NCLEX Exam's management-of-care focus. No other book on the market addresses the heavy management-of-care emphasis—consisting of prioritization, delegation, and patient assignment—of the current NCLEX Examination (17-23% of the 2013 NCLEX-RN Exam). Graduating seniors report that LaCharity has been invaluable in preparing them to pass the NCLEX Exam and enter into practice. **UNIQUE!** Three-Part Organization: The book consists of three parts, each of which builds on the previous one: . Part 1: Introduction; Part 2: Prioritization, Delegation, and Assignment in Common Health Scenarios; Part 3: Prioritization, Delegation, and Assignment in Complex Health Scenarios. This organization establishes foundational knowledge and then provides exercises of increasing difficulty to help students build confidence in their prioritization, delegation, and patient assignment skills. It also helps students move from passing the NCLEX-RN Exam to "hitting the ground running" as they transition into clinical practice. Part 1: Introduction: Part 1, consisting of a chapter by delegation expert Ruth Hansten, provides guidelines for prioritization, delegation, and patient assignment decisions. The Introduction provides a concise, practical foundation on which Parts 2 and 3 build. Part 2: Prioritization, Delegation, and Assignment in Common Health Scenarios: Organized by body system, the chapters in Part 2 begin to give students practice in applying the principles from Part 1 to relatively straightforward scenarios involving single patients or simple patient assignments. Straightforward NCLEX-style multiple-choice, multiple-select, ordering, and short-answer questions help students develop and build confidence in prioritization, delegation, and patient assignment skills while working within the confines of relatively simple health scenarios. Part 3: Prioritization, Delegation, and Assignment in Complex Health Scenarios: Unfolding cases in Part 3 gradually immerse students in realistically complex clinical situations involving patients with complicated health problems or challenging assignment issues. These unfolding cases build on the skills learned in Part 2 to equip students to make sound decisions in realistic, complex health scenarios involving complicated health problems and/or challenging patient

assignment decisions. The "unfolding" nature of each case realistically demonstrates the progression of typical health scenarios and helps students learn to "think like nurses" by developing what Benner (2010) calls "clinical imagination." Answer Key: The in-depth Answer Key at the back of the book provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Detailed rationales encourage formative assessment, in which students learn as much from answering incorrectly as they do from answering correctly. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas New chapters on infection control and obstetrics

This must-have workbook helps students learn the prioritization and delegation skills needed to survive nursing school, pass the NCLEX-RN® examination, and make the transition to practice in today's healthcare environment. Consisting of three parts plus an answer key, this resource provides numerous opportunities for students to review cases and answer questions similar to those they will see on the NCLEX-RN examination - including questions in alternate-item formats . Part 1, written by delegation expert Ruth Hansten, is an introduction that provides a practical review of clinical delegation skills and serves as a framework for the exercises that follow. Part 2 consists cases of patients who have relatively straightforward health problems followed by NCLEX examination-style questions focusing on prioritization, delegation, and assignment. Part 3 consists of complex, unfolding cases involving patients who have multiple health conditions, as well as complex patient assignments. An introduction by prioritization and delegation expert Ruth Hansten explains the importance of developing sound clinical skills and judgment in the areas of prioritization, delegation, and assignment. NCLEX-style questions help students develop fundamental skills in prioritization, delegation, and assignment and become familiar with the NCLEX examination format. Questions in Parts 2 and 3 are organized by body system and by complexity, respectively, to allow for easy use with any medical-surgical nursing text. Both sections of exercises give students essential hands-on practice in prioritizing (deciding what to do first), delegating (giving specific tasks to assistive personnel and supervising satisfactory completion of those tasks), and assignment (giving responsibility for the overall care of particular patients to appropriate personnel). The questions in Part 3 are more complex than those in Part 2, allowing students to master core concepts using unambiguous cases before applying this knowledge to patients with more complicated, multidimensional case presentations. Flexible organization allows the workbook to be used with any Elsevier medical-surgical nursing text. The answer key provides rationales for correct as well as incorrect answers, reinforcing the concepts presented in each unit. Questions follow NCLEX style, and about 10% represent the new alternate-item question format. The workbook is three-hole punched and perforated for convenience.

Master the critical-thinking and test-taking skills you need to excel on the prioritization, delegation, and management questions on the NCLEX-RN®. Three sections provide you with three great ways to study. In the first section, you'll find individual and multiple client care-focused scenario questions organized by disease process with rationales and test-taking hints. The second section features seven clinical case scenarios with open-ended, NCLEX-style questions. The third section is a comprehensive, 100-question exam.

What exactly is an "assignment," and why does it matter? How can educators ensure that their teaching meets the rigorous demands of the Common Core State Standards, so that all students are well prepared for college or careers? Drawing from her extensive experience as a teacher coach, author Eleanor Dougherty answers these questions and many more, with two aims in mind: (1) to guide teachers and administrators in crafting high-quality assignments, and (2) to help educators understand the powerful impact that assignments can have on teaching and learning. The book explains the critical differences among "assignments," "activities," and "assessments" and thoroughly describes the key elements of an assignment: prompts, rubrics, products, and instructional plans. Readers will learn how to * Follow a seven-step process for crafting effective assignments; * Link assignments to units and courses; * Devise "Anchor" assignments for collaboration and consistency across grades; * Tap into instructional "touchstones" that can enrich any assignment; * Create classroom and school environments that support assignment-making; and * Use assignments as a source of data about teaching and learning. Equipped with the knowledge and expertise gained from *Assignments Matter*, readers will be able to create meaningful learning experiences for their students and come to appreciate the author's belief that "assignments may well be the missing link in school reform efforts to improve student achievement."
