For more than 120 years (1714 – 1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover

through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

covers design, development and styling; special-bodied variants; racing performance; buying and owning a compact Jaguar saloon model and, finally, specifications and production figures. This history of all four generations of compact Jaguar and their Daimler equivalents manufactured between 1955 to 1969 will be of great interest to all motoring and Jaguar enthusiasts. Topics covered include buying and owning a Jaguar saloon model; design, development and styling; the cars' competition successes and rare special-bodied models. Superbly illustrated with 208 colour photographs.

On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced

in close collaboration with the company, it draws on invaluable photographic material accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati GranTurismo through to the current models born under the aegis of the Indian firm Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.

Few war films made about the 1939-45 period are complete without sight of a boxy little K ü belwagen light utility vehicle being smartly driven by a German officer. Designed by Ferdinand Porsche and built by Volkswagen, the ' K ü bel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 K ü belwagen had been built. Of simple but sturdy construction, the VW

Type 82 K ü belwagen (which translates as 'bucket car' because of its similarity to a metal bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'K ü bel' were developed and built during the war including its cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-

wheel drive off-roaders. Like the K ü bel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the K ü bel's mechanicals. The appeal of the K ü bel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the

German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker in the UK, the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About 150 original Type 166 Schwimmwagens remain today.
