CliffsNotes TExES Math 4-8 (115) and Math 7-12 (235) is the perfect way to study for Texas' middle school and high school math teacher certification tests. Becoming a certified middle school math teacher and high school math teacher in Texas means first passing the TExES Math 4-8 (115) teacher certification test for middle school teachers or the TExES Math 7-12 (235) teacher certification test for high school teachers. This professional teacher certification test is required for all teachers who want to teach math in a Texas middle or high school. Covering each test's six domains and individual competencies with in-depth subject reviews, this test-prep book also includes two model practice tests with answers and explanations for the Math 4-8 and two model practice tests with answers and explanations for the Math 7-12. Answer explanations detail why correct answers are correct, as well as what makes incorrect answer choices incorrect.

The fourth edition of this comprehensive resource helps future and practicing teachers recognize and assess literacy problems, while providing practical, effective intervention strategies to help every student succeed. The author thoroughly explores the major components of literacy, providing an overview of pertinent research, suggested methods and tools for diagnosis and assessment, intervention strategies and activities, and technology applications to increase students' skills. Discussions throughout focus on the needs of English learners, offering appropriate instructional strategies and tailored teaching ideas to help both teachers and their students. Several valuable appendices include assessment tools, instructions and visuals for creating and implementing the book's more than 150 instructional strategies and activities, and other resources.

When the 1st German Inverted Classroom Conference was staged in 2012, the organizers thought that it may have been the first and last conference of this kind: Too few teachers seemed to be familiar with this model in the first place and only a tiny fragment of them would actually apply this model to their own teaching scenarios. However, in the 2013 conference, we were overwhelmed with a large number of teachers who not only wanted to find out about this teaching and learning concept but had already used it. Consequently, the focus of the 2nd German Inverted Classroom Conference to which this conference volume is dedicated was no longer the "installation" of the Inverted Classroom Model (ICM) but fine adjustments in the actual application of it. This is reflected in the contributions to this volume. Even though all three central aspects of the ICM are addressed, (1) content production and delivery, (2) testing, and (3) the in-class phase, there has been a shift away from mere content production towards an expansion of the model as well as a move towards fine adjustments of the three components.

Teaching/Writing in Thirdspaces: The Studio Approach examines a dynamic approach to teaching composition that reimagines not only the physical space in which writing and learning occurs but also the place occupied by composition in the power structure of universities and colleges. In response to financial and programmatic cutbacks at the University of South Carolina in the 1990s, authors Rhonda C. Grego and Nancy S. Thompson used their academic backgrounds in composition and English education, along with their personal histories in working-class families, to look at compositional spaces and places with an eye to challenging the embedded issues of race, class, and gender within the university hierarchies. The result was a supplemental writing program that they called the writing studio. The studio model emphasizes individual participation in a small group that allows students to present work they are preparing for outside classes, discuss their challenges, and refine their ideas with other students and staff facilitators. This "interactional inquiry" is replicated and reinforced by the facilitators, who meet in their own small groups to analyze larger patterns, possibilities, and needs as they arise in their studios. Grego and Thompson argue that because the studio is physically and institutionally "outside but alongside" both students' other coursework and the hierarchy of the institution, it represents a "thirdspace," a unique position in which to effect institutional change. The focus on interactional inquiry challenges traditional power hierarchies within classrooms and shifts the nature of discourse. As a bottom-up approach to the development of educational programs within institutions that have different needs, demographics, and histories, the studio model can address a multitude of different institutional needs with little disruption to the curriculum. The studio model allows university administrators, teachers, student aides, and students to continually adapt to changing institutional environments with new teaching and learning strategies. Teaching/Writing in Thirdspaces provides an alternative approach to traditional basic writing courses that can be adopted in educational institutions of all types and at all levels.
