and Ian Thomson, leading experts in stakeholder management theory and practice, transform the concept of the SLO from a metaphor to a management tool. The book traces the development of new concepts and measures in the field of stakeholder engagement while following the narrative of a community struggling with a fundamental change in its identity from a declining, malnourished llama-herding village to one of the richest towns in Bolivia. This remarkable story will inspire practitioners in the field of stakeholder management; it will provide an invaluable roadmap for professionals working on land re-use projects in the energy, mining, and conservation sectors; it will make stakeholder relations concepts and techniques accessible to students through an engaging and in-depth case study; and it will open your eyes to one of the most fascinating accounts of how two different
