The New Kings of Crude: China, India, and the Global ...
'The New Kings of Crude is an authoritative narrative of the role of Chinese and Indian oil companies in the "new" global scramble for oil in Africa, drawing on the case of Sudan and South Sudan. It is well-researched, comprehensive and compelling, providing the most detailed analysis of the oil-conflict nexus, and the scope and limits of oil diplomacy involving Asia's emerging powers and both countries.'

A look at how the world's rising powers began international oil empires amidst one of Africa's longest and deadliest civil wars --

China's rapid economic growth over the past three decades has endowed it with enormous power. Chinese leaders now want to harness this power to become the world's dominant country, replacing the US as the global superpower. In *How China Loses*, Luke Patey argues that despite all its strengths, China cannot simply get what it wants. The ambitiousness of China's global economic agenda and pursuit of military expansion are undermining its ability to realize itsgeopolitical plans; other countries are beginning to resist. Weaving together on-the-ground reportage and analysis from Africa to Latin America, East Asia to Europe, Patey explores how the world is responding to China's rise and what this means for everyone.

Reveals the covert agreements that prompted America's decision to switch allegiance from Iran to Saudi Arabia as a dominant Middle-East oil supplier, citing the contributions of key players from Richard Nixon and Henry Kissinger to the Shah and Gerald Ford while explaining how choices in the 1970s set the stage for Iran's Islamic revolution.

History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to Frck with powerful women--from pirate queens to diehard suffragettes to Cleo-f*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how.

The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

A veteran of the CIA provides an insider's account of the love-hate relationship between the United States and Saudi Arabia, giving an up-close view of the corrupt Saudi empire and how the royal family's support of a radical religious group helps keep them in power while fostering hatred of the West throughout Saudi society, and explaining why turning a blind eye to Saudi turmoil has damaged America's homeland security. Reprint. 75,000 first printing.

No man is impervious to the poisons of the crown...Having murdered his wife and exiled his mistress, King Louis X of France becomes besotted with Princess Clemence of Hungary and makes her his new Queen. However, though the matter of the succession should be assured, it is far from so, as Louis embarks on an ill-fated war against Flanders. Where his father, Philip IV, was strong, Louis is weak, and the ambitions of his proud, profligate barons threaten his power and the future of a kingdom once ruled by an iron King. This is the third book in the author's Accursed Kings series of novels set in the early 14th century during the period of crisis within the ruling Capetian dynasty when after the death of the Iron King, Philip IV, his three sons ruled for short periods, thus encouraging England's King Edward III to claim the French throne through his mother, thereby precipitating the conflict known later as the Hundred Years War. The first of these sons, Louis X is the subject of this novel, and in particular his relationship with his second wife Clemencia of Hungary. More plotting, scandal and family tensions abound, though the plot of this novel seems a little lighter than that of the first two books.

Magnificent and Beggar Land is a powerful account of fast-changing dynamics in Angola, an important African state that is a key exporter of oil and diamonds and a growing power on the continent. Based on three years of research and extensive first-hand knowledge of Angola, it documents the rise of a major economy and its insertion in the international system since it emerged in 2002 from one of Africa's longest and deadliest civil wars. The government, backed by a strategic alliance with China and working hand in glove with hundreds of thousands of expatriates, many from the former colonial power, Portugal, has pursued an ambitious agenda of state-led national reconstruction. This has resulted in double-digit growth in Sub-Saharan Africa's third largest economy and a state budget in excess of total western aid to the entire continent. Scarred by a history of slave trading, colonial plunder and war, Angolans now aspire to the building of a decent society. How has the regime, led by President Jos? Eduardo dos Santos since 1979, dealt with these challenges, and can it deliver on popular expectations? Soares de Oliveira's book charts the remarkable course the country has taken in recent years.

Documents the story of how an American secretary was declared the monarch of a small fishing village on Ghana's central coast, recounting the challenges she faced in improving local circumstances, providing education and countering regional corruption. 100,000 first printing.
